

Give every learner confidence in accounting

Every learner’s path into accounting is unique. Pearson Canada’s program pairs trusted, vetted, inclusive content with AI-powered tools so students get support that adapts to them—building confidence class by class. Educators can map learning directly to the current CPA competency framework, and students practice real skills (from Excel to data analytics) that employers expect. It’s a journey designed for student success and a future-ready workplace—and every product stays aligned to CPA outcomes to make that journey clear and achievable.

MyLab® Accounting

Designed for flexibility, MyLab Accounting allows you to customize courses to your curriculum and the unique needs of your students. Each course includes a solid set of interactive, subject-specific content and digital assets that can be easily customized and assigned.

KEY FEATURES

- **Dynamic Study Modules (DSMs):** Using a highly personalized, algorithmically driven process, DSMs continuously assess student performance and provide additional practice where it’s needed most.
- **AI-powered study tool:** Revolutionize your students’ learning experience with our groundbreaking AI-powered study tool for MyLab. This tool offers students personalized homework assistance, simplified explanations of course material, and guided practice.
- **Data Analytics Projects:** Offer students hands-on experience with real-world accounting scenarios, helping them analyze data and make informed business decisions.

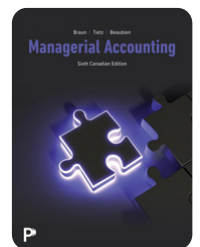

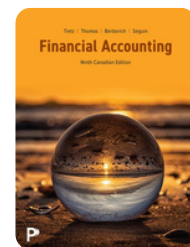

“I love the way the ‘Help me solve this’ feature is able to guide me through each question while giving me additional information I might need as well as tips and tricks to help with my calculations.”

– Student User,
MyLab Accounting
