

Lifelong Learning Entitlement (LLE) Guide

February 2026

Contents

This guide supports providers in understanding how Higher Nationals, delivered via HN Flex, can be used to build a compliant and employer-responsive modular offer under the Lifelong Learning Entitlement (LLE).

It outlines the key policy changes, operational requirements, curriculum design considerations, and the end-to-end approval and quality assurance process.

Introduction

The Lifelong Learning Entitlement (LLE) is set to transform student finance and modular learning in England from academic year 2026/27, with courses starting on or after January 2027. It provides individuals with a loan entitlement equivalent to four years of post-18 education (currently £38,140), which can be used flexibly for modules or full courses at levels 4 to 6 across colleges, universities, and independent training providers.

Core features

- **Entitlement:** New learners up to age 60 can access full tuition for four years; returning learners may have reduced entitlement based on previous funding.
- **Flexibility:** Funding can be used for individual modules (maximum of 30 credits) or full courses at levels 4–6, including priority subjects and longer courses (e.g. medicine).
- **Qualification Rules:** ELQ restrictions are removed, enabling flexible retraining and upskilling. Maintenance loans and targeted grants are available for eligible courses.

Pearson has 49 Higher National qualifications approved as HTQs across a broad range of occupational sectors, providing a wealth of cutting-edge, occupationally relevant content for you to choose from when building a modular offer.

The smallest fundable entity in the LLE is a 30-credit module. This is made up of two 15-credit Higher National units of your choice. We have provided ideas and guidance for how you might combine units: [read more](#).

You can offer HN unit-level content via the HN Flex service, enabling your students to access their LLE funded offer.

Key dates for providers

Spring/Summer

2026

Submit course data to Student Loans Company CMS.

September 2026

Student applications for LLE funding open.

January 2027

First LLE modular courses begin.

The first qualifications to be made available for modular funding under the LLE will be level 4 and 5 qualifications **approved by Skills England as Higher Technical Qualifications (HTQs)**.

Why build a modular LLE offer using HN Flex?

Benefits to students

- **Offers flexibility** to gain knowledge skills and behaviours in a bite-sized way without enrolling onto a full qualification.
- **Stack units** for a future Higher National qualification.
- **Progress** towards a Higher National Certificate (HNC) or Higher National Diploma (HND) qualification.
- **Upskill and reskill** through individual units of CPD as needed.
- **Study up to four units** across different subjects for professional accreditation.

Benefits to providers

- **Deliver Higher Nationals flexibly** to address various training needs, including employers and local authorities.
- **Develop employer partnerships** by meeting staff development requirements.
- **Offer CPD options** beyond standard qualifications.
- **Encourage diverse groups**, such as adult learners, to return to education.
- **Provide HE-level 'taster' courses** to support progression from level 3 or entry into higher education.
- **Supply bridging units** for smooth transition from level 4 to 5 studies.
- **Enable flexible delivery methods**, such as short targeted units that can be blended into full HN programmes.

Preparing to offer

To offer LLE-funded courses, providers must:

- Register with the Office for Students.
- Pass the Department for Education (DfE) Gateway approval process.
- Be approved to offer the qualification that they wish to deliver units from via HN Flex.
- Once HN units for offer have been chosen, apply for HN Flex delivery.

HN Flex approvals process

HN Flex will follow existing approvals process for Vocational Qualifications.

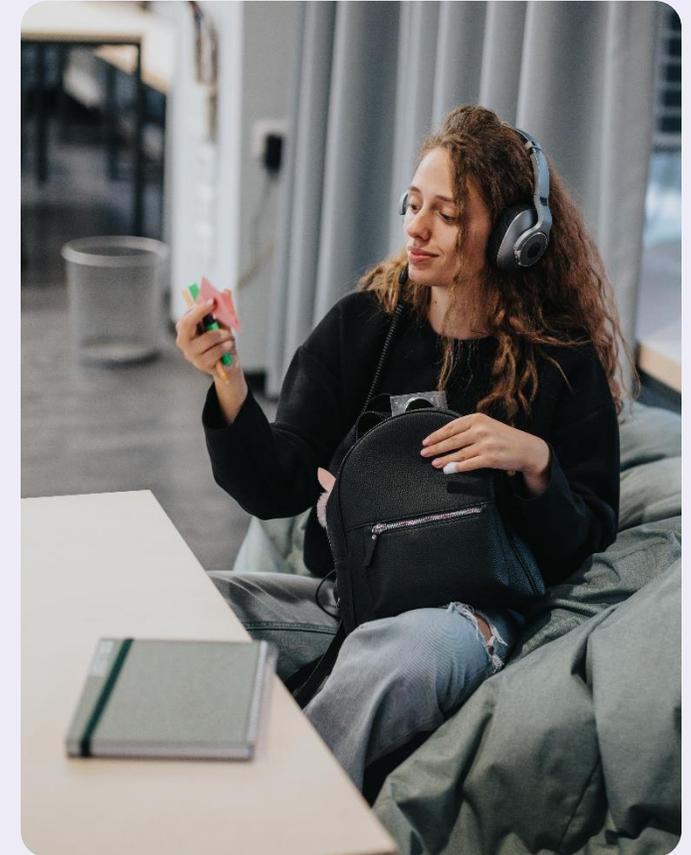

Centres will submit an online application form via Edexcel Online

Edexcel Online > Log in > Navigate to Qualifications > BTEC > Request for Qualification Approval > Qualification Approval > Offering additional vocational qualifications.

Or apply via an offline form provided by Customer Services.

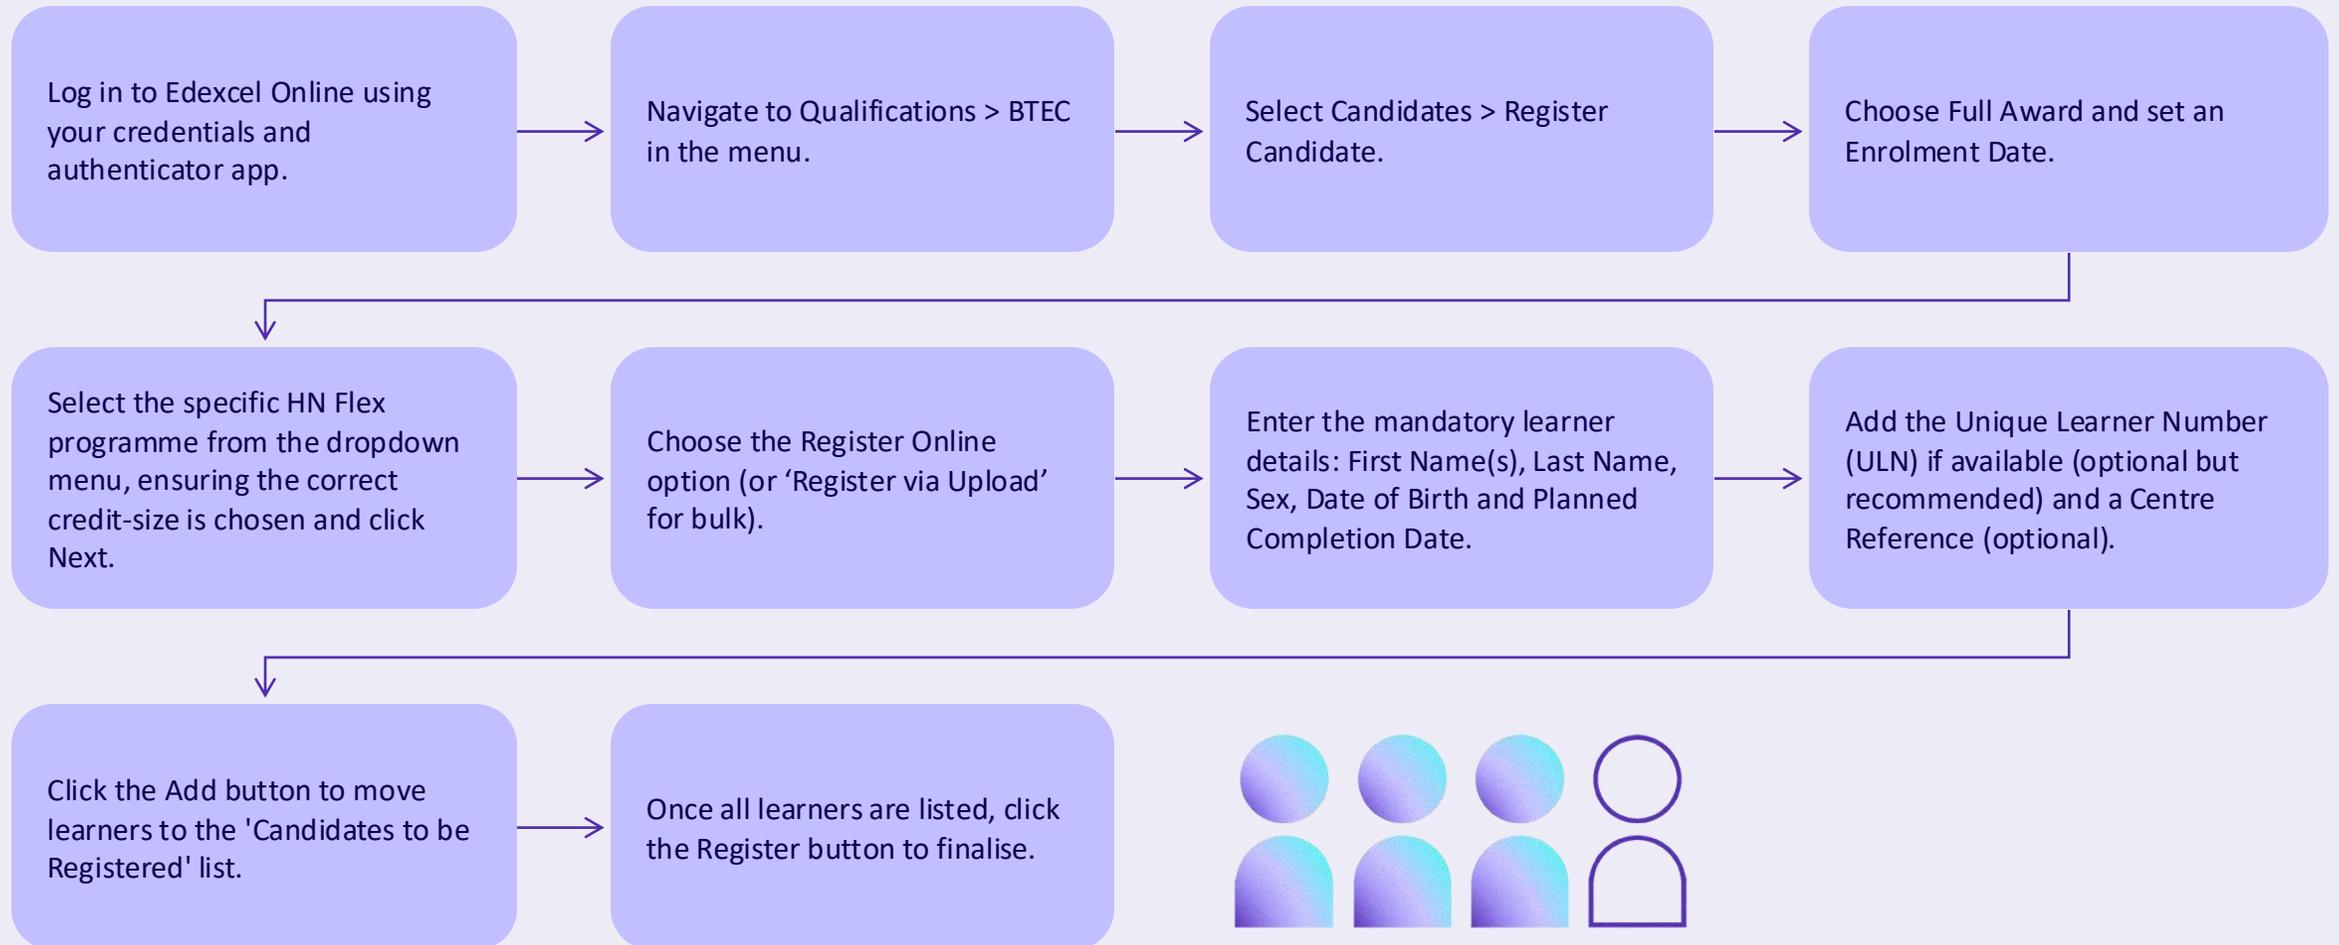

A CRM case is created with a unique reference number and referred to the Approvals team for processing.

An outcome will be provided within 23 days of the completed application being submitted, with updates being provided by the Approvals team throughout.

Registering students/EoL process

To register learners for HN Flex, centres must use Edexcel Online following these steps

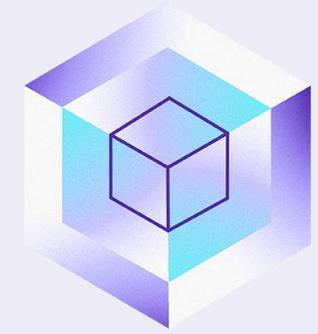

Curriculum Design & Modular Delivery

Using Higher Nationals and HN Flex with the Lifelong Learning Entitlement

- 49 Higher Nationals are approved as Higher Technical Qualifications (HTQs), the first qualifications eligible for modular funding.
- HN Flex enables delivery of individual units from HTQs to meet local learner and employer needs. The smallest fundable module is 30 credits, made up of two 15-credit HN units from the same parent qualification.
- 30-credit HN units are not available via HN Flex as part of this offer as these units are more synoptic in nature.
- Providers bundle units into modules tailored to local, employer and learner needs.

Curriculum Design & Modular Delivery

Building HN modules

When combining HN 15-credit units to form 30-credit LLE modules, providers should bear in mind:

- The nature of the target learner audience – are they in work? Progressing from level 3 programmes within the college? Adults returning to learning?
- Whether local/regional labour-market needs suggest specific unit combinations
- Does the module provide industry-relevant knowledge
- Whether transferable skills emerge across both units in the module and how can they be linked
- Which unit combinations will feel most relevant and motivating to learners
- Do the units together build a coherent skillset rather than feeling disjointed
- Avoiding pairing two very demanding units unless appropriate support exists
- What onward progression opportunities will the module afford
- If Level 4 units are chosen, does the 30-credit module serve as a bridge to Level 5 units?
- How to make module names and descriptions feel coherent and purposeful
- How to approach assessment e.g. balancing formative and summative assessment points, considering introducing integrated assessments that reduce duplication and emphasise synthesis
- Staff and equipment requirements to successfully delivery modules
- Whether employers could contribute guest sessions, case studies, or equipment access
- Whether the 30 credits be delivered together or sequentially, and how that interacts with the delivery of the same units for full qualifications e.g. timetabling of the course for staff and room/resource efficiency

Curriculum Design & Modular Delivery

Sector approaches

To get you started thinking about the types of modules you could create from Higher Nationals units we've provided some exemplar modules across a range of key higher technical sectors.

Higher Nationals in Leadership and Management for England

LEVEL 4 MODULES

Module title: Creative Marketing

Units:

- 2 Marketing Processes and Planning
- 8 Digital Business

Potential use: To upskill marketers to create compelling marketing strategies that integrate digital media planning to maximise the impact of marketing campaigns.

LEVEL 4 MODULES

Module title: Strategies for Business Success

Units:

- 1 The Contemporary Business Environment
- 2 Marketing Processes and Planning

Potential use: To develop professional skills in data and information analysis and interpretation to drive business success and achieve organisational objectives.

LEVEL 4 MODULES

Module title: Performance Management

Units:

- 3 Managing Human Resources
- 4 Leadership and Management

Potential use: To upskill leaders and managers in effective communication, motivation and workforce planning, inspiring the adoption of high-performance working practices to drive business excellence.

Sector selection

Business

Higher Nationals in Leadership and Management for England

LEVEL 5 MODULES

Module title: Mastering Team Development

Units:

- 9 Organisational Behaviour Management
- 14 Developing Individuals, Teams and Organisations

Potential use: To empower HR leaders and managers with versatile professional skills, enabling them to excel in team leadership and drive outstanding performance management.

LEVEL 5 MODULES

Module title: Strategic Thinking

Units:

- 12 Business Strategy
- 16 Business Data and Analytics

Potential use: To provide cross-cutting professional skills in data analysis processes, data mining and data transformation to influence strategic choice and direction.

LEVEL 5 MODULES

Module title: Operational Solutions

Units:

- 11 Principles of Operations Management
- 13 Business Information Technology Systems

Potential use: To equip professionals with elevated expertise in using IT solutions and advanced technologies to enhance operational efficiencies.

Sector selection

Business

Higher Nationals in Leadership and Management for England

LEVEL 4/5 COMBINATION MODULES

Module title: Stakeholder Management

Units:

- 1 The Contemporary Business Environment
- 15 Business Communications and Relationship Management

Potential use: To provide cross-cutting professional skills to enable business professionals to effectively engage, manage, and satisfy a diverse range of stakeholders.

LEVEL 4/5 COMBINATION MODULES

Module title: Building Business Resilience

Units:

- 7 Operational Planning and Management
- 11 Principles of Operations Management

Potential use: To provide upskilling for those in operation roles to implement business continuity plans and risk assessment that optimise organisational efficiency and build resilience.

Higher Nationals in Sustainable Business Management for England

LEVEL 4 MODULES

Module title: Principles of Sustainability

Units:

- 1 Principles of Sustainability
- 3 Sustainable Business in Practice

Potential use: To develop understanding and implementation of the pillars of sustainability and sustainable business practices to drive lasting positive business impact.

LEVEL 5 MODULES

Module title: Leading Sustainable Transformation

Units:

- 10 Organisational Behaviour Management
- 13 Principles of Change Management

Potential use: To empower leaders and managers with the skills needed to drive transformative change in sustainability and champion the environmental, social, and governance (ESG) agenda.

LEVEL 4/5 MODULES

Module title: ESG Principles

Units:

- 5 Corporate Governance and Ethics
- 11 Environmental, Social, Governance Planning

Potential use: To upskill those in business roles that are concerned with management culture and promoting the case for good governance and corporate social responsibility, inspiring organisations to lead by example and drive positive change.

Construction

Construction

LEVEL 4 MODULES

Module title: Construction Digital Information Management

Units:

- 13 Building Information Modelling
- 26 Digital Applications for Building Information Modelling

Potential use: To deliver essential digital modelling skills and foundational knowledge, preparing students for advanced study in Architectural Technology and related construction disciplines.

HTQ approved Qualification: Higher National Certificate in Architectural Technology for England*

LEVEL 4 MODULES

Module title: The Construction Environment and Operations

Units:

- 4 The Construction Environment
- 20 Site Supervision & Operations

Potential use: To equip students who wish to progress from level 3 study with essential knowledge and skills, enabling progression to advanced studies and qualifications in Construction Management at Level 4 and above.

HTQ approved Qualification: Construction Management for England (Construction Site Supervisor)*

LEVEL 4 MODULES

Module title: Principles of Modern Methods of Construction

Units:

- 15 Principles of Alternative Energy
- 24 Principles of Off-site Construction

Potential use: To enable students to understand innovative and exciting technologies used in modern construction - specifically, the use of alternative energy and off-site construction methods.

HTQ approved Qualification: Higher National Certificate in Modern Methods of Construction for England

HN Flex quality assurance process

The quality assurance process for delivering Pearson qualifications is tailored according to whether your centre is new to Pearson or is already established in delivering these qualifications.

FOR NEW CENTRES

If your centre is new to delivering Pearson qualifications, you will be required to complete both the centre and programme approval processes.

Once your centre has been onboarded and your learners are ready to receive certification, an External Examiner will be allocated to your centre to conduct a sampling activity. This activity involves a thorough review of several key areas, including management systems, centre recognition, learner support, assessment and verification practices, as well as record keeping.

To ensure consistent compliance with Pearson's requirements, a minimum of two sampling interactions will be scheduled per academic year. These regular interactions help maintain the quality and integrity of the qualifications delivered.

FOR ESTABLISHED CENTRES

If your centre is already established in delivering Pearson qualifications, you must ensure that you are approved to deliver the specific units that comprise the HN Flex programme.

For centres that already hold programme approval and have received a sampling outcome of 'Release' within the past twelve months, your allocated External Examiner will work with you to agree a sampling plan. This plan includes observing the delivery of the short course, reviewing a sample of assessment and verification decisions, and examining records such as standardisation documentation and ongoing continuing professional development (CPD).

In cases where your centre does not hold a recent sampling outcome of 'Release,' the External Examiner will carry out a more comprehensive sampling. This will, at a minimum, review your management systems, centre recognition, learner support, assessment and verification practices, and record keeping.

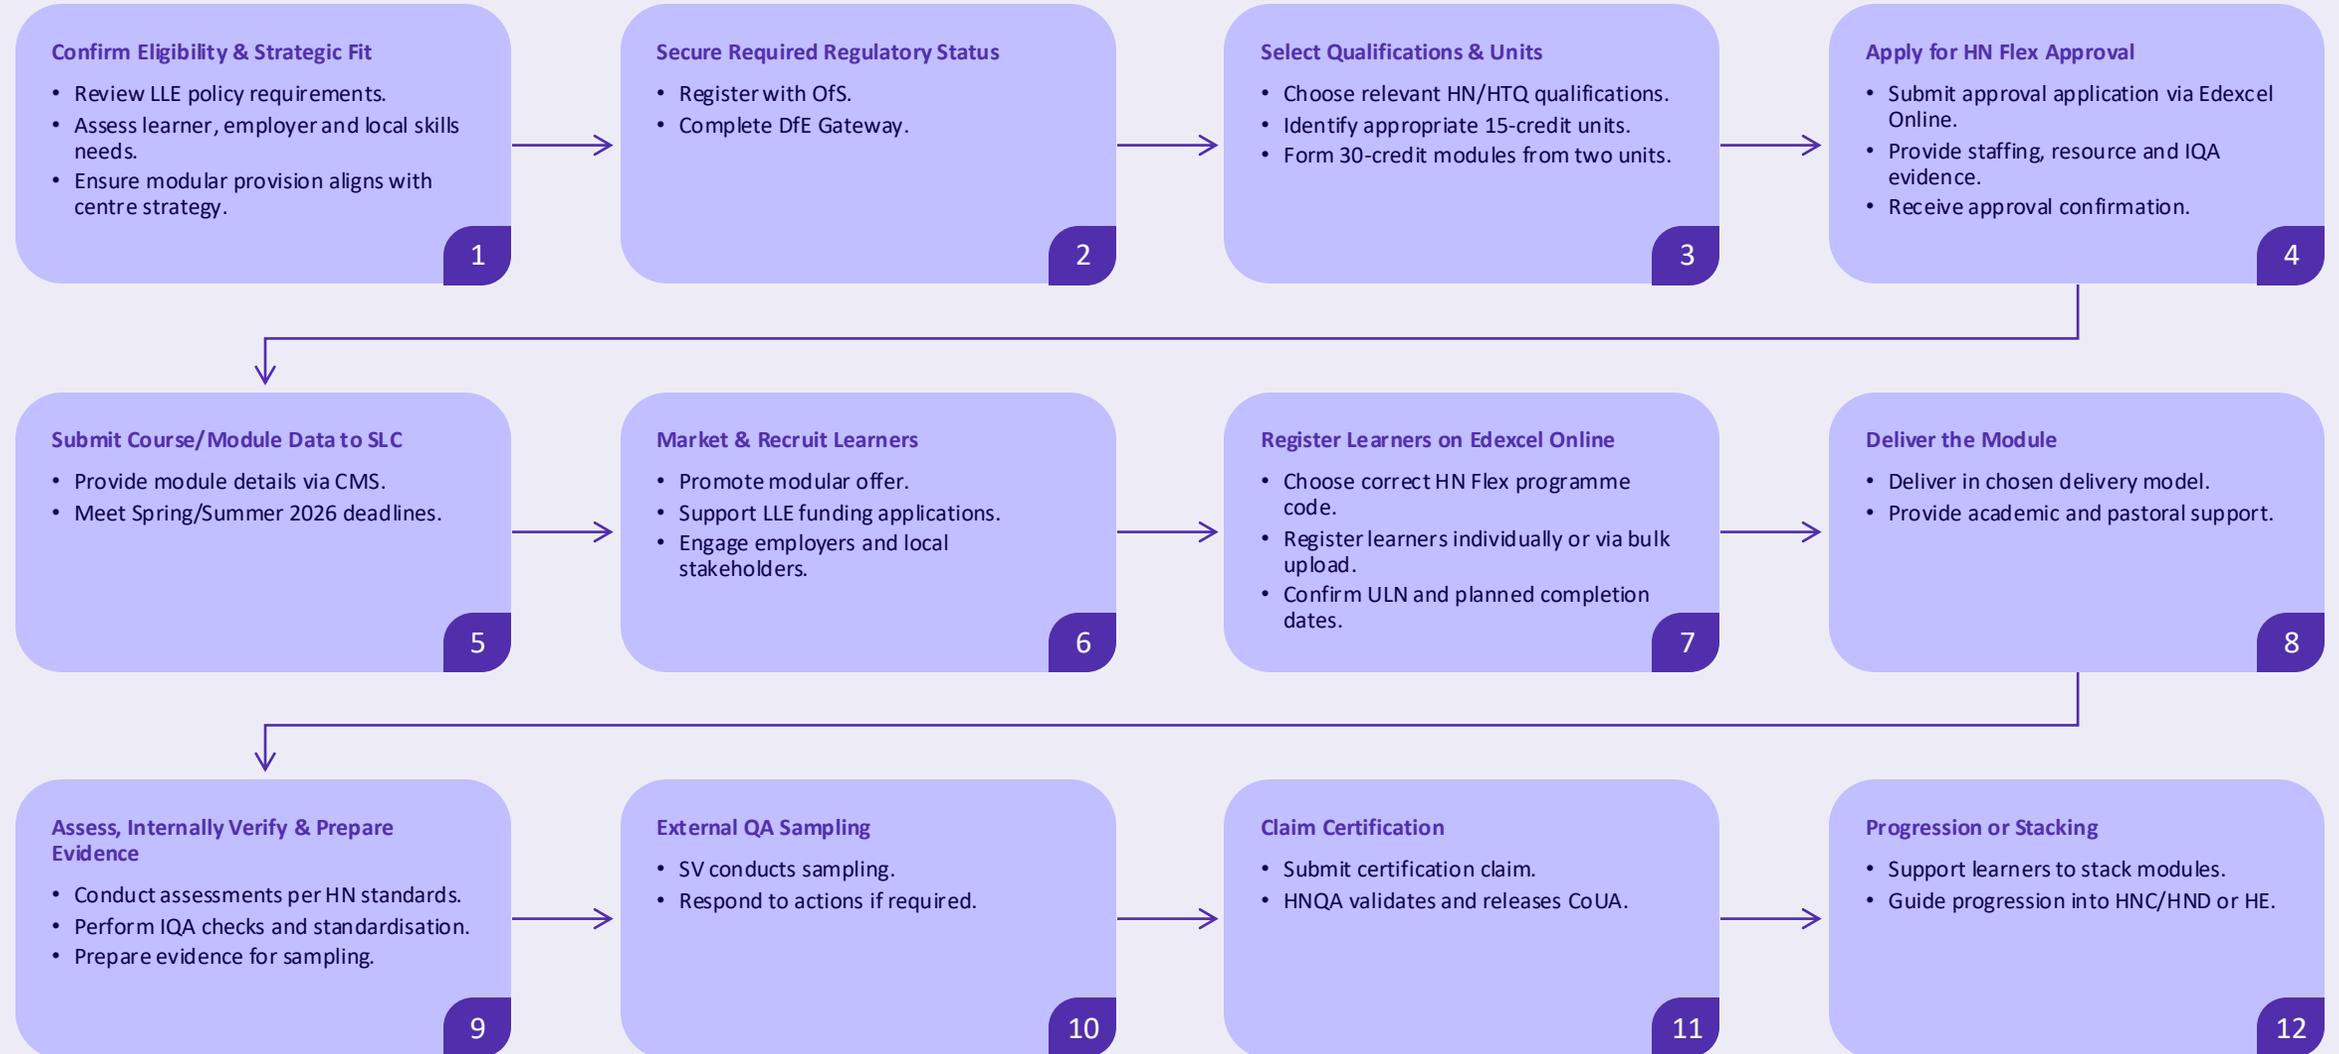

Certification Process

To facilitate prompt certification, it is crucial to enter accurate expected completion dates for learners when registering them in Edexcel Online. Recording these dates ensures that External Examiners can be allocated efficiently, enabling timely support for the release of certification. It is typical for External Examiners to conduct their sampling activities within six weeks after learners have completed their programmes of study.

Certification claims should be made via Edexcel Online. Upon successful completion of their modules, students will be issued a Certificate of Unit Completion for all units completed within their courses.
