

GCSE Maths Reform Readiness Checklist

Know what to focus on now and what comes next.

For Heads of Maths and Multi Academy Trust leaders
preparing for every stage of GCSE Maths reform.

Mapped to the GCSE Maths reform timeline from 2026 through to first exams in 2031.

**First teaching in 2029 and first exams in 2031 represent the earliest anticipated dates based on current DfE and Ofqual information and are subject to change.*

Independent of which awarding body you eventually choose.

Now:

Baseline & Readiness Audit

Curriculum & Sequencing

- Review current KS3 schemes of work against likely reformed GCSE content
- Map where existing KS3 content and SoW already provides strong foundations for GCSE content, and where this could be improved

- Establish a shared curriculum review template and process across all schools, rather than each site working independently
- Nominate a lead school or subject lead to coordinate curriculum review across the trust

Engagement & Consultation

- Respond to the DfE public consultation when it opens
- Engage with subject associations (AMiE, ATM, NCETM, MA) and exam boards on their consultation response

- Coordinate a single trust-wide consultation response informed by input from all schools, alongside individual responses where useful

Workforce & Staffing

- Audit current non-specialist teaching proportion in Maths, by year group and level
- Identify likely CPD needs based on anticipated content and assessment changes

- Compare non-specialist teaching proportion across your schools so investment is targeted where it's needed most

Governance

- Name a single lead responsible for tracking reform preparedness for your department
- Link up with exam boards for key contact to stay up to date with reform news. Ensure this lead is receiving and engaging with monthly Subject Advisor updates <https://qualifications.pearson.com/en/subjects/mathematics.html>
- Add 'GCSE Maths Reform' as a standing item on appropriate meeting agendas to keep team in the loop

- Establish a trust-level reform steering group with clear information sharing and decision-making processes for schools
- Open a transition risk register at trust level and ensure individual schools feed into this for a smooth transition to reformed GCSEs (advised whether switching or staying with current exam board)

September 2026 – 2027:

Public Consultation & Drafts of New Specification

Curriculum

- Submit your consultation response on the draft subject content
- Monitor exam board accreditation announcements as specifications are developed
- Update your earlier gap analysis once draft subject content is published
- Agree the criteria which you will use to evaluate reformed qualifications from each exam board

Assessment & Data

- Capture a historic attainment baseline now, so the impact of reform can be properly measured later
- Start assessing the likely Progress 8 impact under the proposed accountability changes

- Align baseline data collection methodology across all schools so trust-wide comparisons remain valid
- Consider how Progress 8/Attainment 8 impact might vary between schools in your trust

Workforce & Staffing

- Commit a CPD budget line for reform-related training
- Scope your recruitment and ECT pipeline for Maths
- Prioritise recruitment and CPD spend where specialist gaps are greatest across your schools
- Identify opportunities for shared CPD delivery or joint training days across the trust

Digital & SEND

- Audit device and connectivity readiness to support digital teaching and learning resources (assessment itself is remaining paper-based)
- Assess staff digital literacy and training needs for new platforms or tools
- Review EAL considerations alongside SEND planning, given how language-heavy current papers can be
- Flag likely exam access arrangement implications once assessment format detail is known

2028:

Schools Choose & Prepare

Strategic Decisions

- Review new GCSEs from each exam board
- Revisit your Tiering entries decision policies and pathways
- Finalise KS3 sequencing changes ready for first teaching
- Agree a trust-wide position on exam board choice, or confirm deliberate flexibility, and the rationale either way

Workforce & Staffing

- Finalise staffing plans and recruitment for the September 2029 start
- Confirm your ECT and specialist training pipeline is in place
- Finalise a trust-wide CPD calendar and any cross-school deployment plans agreed in 2026–27

Governance & Communication

- Report reform progress as a tracked risk to SLT and governors
- Develop a parent/carers communication plan for qualification changes
- Update careers and HE guidance for any university entry-requirement implications
- Report reform progress as a tracked risk to the trust board, not just individual local governing bodies
- Agree a consistent trust-wide parent communication approach, adapted locally as needed

Resourcing & Finance

- Confirm procurement of new textbooks and teaching resources once your specification is chosen
- Flag any capital investment needs to SLT or the trust board early
- Coordinate capital investment across schools ahead of trust level budget-setting

Legacy Planning

- Plan arrangements to manage any cohorts partway through legacy specifications at the point of transition
- Ensure management of completing legacy qualifications is consistent across all schools

September 2029 (earliest): First Teaching

Delivery Readiness

- Complete a Day 1 provisioning check: resources, staffing and timetabling all in place
- Redesign your internal assessment calendar to reflect new content and paper structure
- Realign your mock exam strategy to the new specification
- Update MIS and data systems for the new Progress 8 structure
- Confirm exam access arrangements are updated for the new assessment format
- Monitor delivery of the new curriculum against updated guidelines in the first term

Trust Coordination

-  Keep a close eye on delivery across your schools in the first year, and act quickly on early issues
-  Share early delivery learnings across schools to support consistency, particularly where staffing or resourcing gaps were identified during 2026–28

Summer 2031 onward:

First Exams & Embed

Results & Review

- Prepare for first results day under the reformed qualification, including staff and student expectation-setting
- Review outcomes against the pre-reform baseline
- Refine curriculum and resourcing based on the first cohort's actual experience
- Update careers and HE guidance based on any confirmed university response to new grading or content

Trust-Wide Learning

-  Reflect on how results varied across your schools, and where further support might help
-  Capture and share lessons learned across the trust ahead of Phase 2 GCSEs (from September 2030) or subsequent year groups
