

BE THE FUTURE OF TECH

# Where can **GCSE Computer Science** lead you?

Discover what it takes to become a **Game Designer...**

## What is a Game Designer?

A game designer imagines, designs, and develops video games. They create the game's mechanics, storyline, and characters, blending artistry with technology to create exciting and immersive worlds.

### Key Responsibilities:

- ✓ Developing game concepts, storylines, and characters.
- ✓ Designing gameplay mechanics and user interfaces.
- ✓ Working with artists, programmers, and sound designers.
- ✓ Creating prototypes and testing game features.
- ✓ Analysing player feedback to improve game design.
