

BE THE FUTURE OF TECH

Where can GCSE Computer Science lead you?

Discover what it takes to become a Graphic Designer...

What is a Graphic Designer?

A graphic designer uses visuals to communicate ideas and messages. They design graphics for various media, including print, digital, and advertising, combining artistic skills with technical expertise to create compelling visual content.

Key Responsibilities:

- ✓ Using design software like Adobe Photoshop, Illustrator, and InDesign to produce high-quality graphics.
- ✓ Creating graphics for websites, social media, and online advertising.
- ✓ Working with clients and creative teams to understand goals and requirements.
- ✓ Reviewing and refining designs based on client feedback.
