

BE THE FUTURE OF TECH

Where can GCSE Computer Science lead you?

Discover what it takes to become a **Mobile App Designer...**

What is a Mobile App Designer?

A mobile app developer designs, creates, and updates applications for mobile devices like smartphones and tablets. They work with different programming languages and platforms to bring innovative app ideas to life.

Key Responsibilities:

- ✓ Designing user-friendly app interfaces.
- ✓ Writing clean, efficient code for mobile platforms (iOS, Android).
- ✓ Testing and debugging applications to ensure they work correctly.
- ✓ Working with designers, product managers, and other developers.
- ✓ Updating and maintaining apps to improve performance and user experience.
