

BE THE FUTURE OF TECH

Where can **GCSE Computer Science** lead you?

Discover what it takes to become a **Multimedia Artist...**

What is a Multimedia Artist?

A multimedia artist uses digital tools and techniques to create visual and audio content for films, games, websites, and other media. They blend artistic skills with technology to produce engaging and dynamic multimedia experiences.

Key Responsibilities:

- ✓ Creating digital artwork and animations using software like Adobe Creative Suite, Blender, or Maya.
- ✓ Designing visual effects and motion graphics for films, games, and online content.
- ✓ Working with directors, designers, and other artists to agree on creative vision.
- ✓ Editing multimedia content to ensure quality and consistency.
