

BE THE FUTURE OF TECH

# Where can **GCSE Computer Science** lead you?

Discover what it takes to become a **Website Developer...**

## What is a Website Developer?

A website developer creates and maintains websites. They ensure that websites work for all users, and look good, using a mix of technical and creative skills.

## Key Responsibilities:

- ✓ Designing and building website layouts.
- ✓ Writing code using HTML, CSS, and JavaScript.
- ✓ Ensuring websites are responsive and work on all devices (mobile and computer).
- ✓ Testing and debugging to optimise performance.
- ✓ Working with designers, content creators, and other developers.
