

# MyMathLab for School

Dual enrollment of high school students in college-level courses is on the rise, nationwide.

How can you serve the learning needs of this increasingly numerous and diverse student population?

With our help.

Pearson works tirelessly to provide best-in-class resources for students and educators.

And MyMathLab for School, known as MyLab Math in higher education, is no different.

As the world's leading online tutorial and assessment program for teaching and learning mathematics, MyMathLab for School aligns with more than 400 Pearson mathematics and statistics textbooks, ranging from Pre-Algebra to Differential Equations.

By utilizing MyMathLab for School in your high school classroom, you're leveraging the same solution that higher education institutions are using. The only difference is in the name.

With MyMathLab for School, Your students will benefit from:

- Personalized, adaptive learning
- Interactive practice with immediate feedback
- and the complete eText, accessible anywhere including offline, with the Pearson+ app.

As an instructor using MyMathLab for School, you will have access to:

- flexible course design options that fit your needs,
- multimedia learning resources, including videos and animations,
- And a comprehensive gradebook with enhanced reporting.

MyMathLab for School.

Ready for college, ready for life.
