

Do you know Revel?

Political Science

There it is. And there. And there.

When your student lights up because they just got it. You watch it in real time, and you can't get enough of it. Let's make it happen more often.

Enter Revel. A digital learning platform that makes your students feel the connection between their classroom and the world.

Revel doesn't just bring learning to life; it brings real life to learning. Students will receive timely political content in your classroom, so what they're learning is relevant to what you're teaching.

Let's take a look at Revel Political Science.

Current Events Bulletins appear at the beginning of each chapter and connect key concepts to real-life events.

Author Blogs are written by experts who explain what's happening in the political space and how it relates to specific topics in political science.

Current Events Bulletins and Author Blogs are updated each semester, allowing students to look at essential ideas through the lens of real-world events.

Students learn best by doing, and Revel's interactive features let them do more in your course.

Pearson Originals videos make complex political topics simpler for students, to get them thinking for themselves. The Politics Hidden in Plain Sight video series gives concrete examples of how politics influences students' daily lives. Each Common Group Video gives students the pros and cons on controversial topics, then asks them to weigh in with their own perspectives.

Interactive maps, figures, and tables contain Social Explorer technology that lets students engage with real-world data, instead of simply viewing it, helping them develop strong data literacy skills.

Revel inspires and empowers students to apply their learning, not just in your course, but in their lives today, and their future careers.
