

Do you know Revel?

Sociology

There it is. And there. And there.

When your student lights up because they just got it. You watch it in real time, and you can't get enough of it. Let's make it happen more often.

Enter Revel. A digital learning platform that makes your students feel the connection between their classroom and the world.

Revel doesn't just bring learning to life; it brings real life to learning. Let's take a look at Revel Sociology.

Students will receive timely sociological and political content in your classroom, so what they're learning is relevant to what you're teaching.

Pearson Originals video series explain complex sociological concepts in simplified and interesting ways.

The **Documentaries** series helps students understand the topics that matter today, putting human faces on the opioid epidemic, immigration issues, the changing labor force, and more.

The **Sociology Explainer** series breaks down complex political concepts like federalism, gerrymandering, and executive action.

Current Events Bulletins are updated each semester and appear at the beginning of each chapter and connect key concepts to real-life events.

Students learn best by doing, and Revel's interactive features let them do more in your course.

Interactive maps, figures, and tables contain Social Explorer technology that lets students engage with real-world data, instead of simply viewing it, helping them develop strong data literacy skills.

Revel inspires and empowers students to apply their learning, not just in your course, but in their lives today, and their future careers.
