some of the key things that we really focused on for the the third edition first and foremost was listening to user feedback so Pearson spent a lot of time talking to users of the first and second editions instructors and students and we took that feedback to heart so the Third Edition I would say a huge thing we're aiming for is making the course uh easier for instructors and students to use there are a tremendous amount of resources available on the Pearson mylab platform that's that's one of the the great benefits of of working with a Pearson course and in the Third Edition we tried to pull all of that together in a way that was more seamless for instructors so most importantly we now have a print version so the Third Edition will come with a hard copy for instructors

this will

contain a synthesis of the resources available so what guided worksheets you can use at different points in the text what videos and there's also PowerPoint slide Decks that are available for instructors

so definitely ease of use was a a big priority for us and the second thing was trying to do a better job of articulating the power and utility of using spreadsheets in Excel to truly Empower our students
