

Pearson Courseware Video TRANSCRIPT

Learning goes far beyond books and classrooms. It's moments of understanding that spark and ignite bright futures. When learning happens, success follows. And that word, "success," means something different to each of your students. The freshman, the single parent, the veteran. They come to your class with big dreams, but also big challenges. Financial hurdles, time constraints, geographical limitations. These can be overcome.

Pearson's learning platforms clear the road to unhindered learning. MyLab and Mastering lets you build customized courses without borders. Pearson+ turns any place into a learning space with on-demand access to eTextbooks, videos, and study aids. And Revel puts students behind the wheel of learning to drive success through active participation. Each platform has a specific purpose. Yet, all are built on a foundation of world-class content from authors and experts you trust.

With Pearson courseware, hurdles become stepping stones, constraints, opportunities and limitations, possibilities. Together, one student at a time, we'll build a better future.
