

# MyLab IT NextGen – Grader Projects

---

When learning how to use Microsoft Office applications, it is crucial for your students to practice their skills in a real-world context.

Grader projects, in MyLab IT, support this by allowing students to complete projects live within the Microsoft applications. And there are over 800 grader projects that are auto-graded and monitored for integrity violations.

Now, experience Mylab IT in a new way. Introducing Mylab IT Next Gen with unparalleled simplicity, faster load times, and enhanced features.

With Mylab It NextGen, our grader project customization feature allows you to adjust score values, rewrite step-by-step instructions, and modify any potential hints you would like to offer your students.

For even greater flexibility and personalization, you can build custom greater projects from the ground up with the project creation tool and deploy them within your course.
