

Pearson AI Study Tool Promo Video – Student Version

TRANSCRIPT

2:00 a.m. and the chemistry final is only hours away.

11:00 p.m. and the project is due at midnight.

Whenever students are working, so is Pearson's AI-powered study tool. And it's changing the way students can learn.

Unlike other generative AI resources, our study tool was developed with insights from leaders in learning science and is backed by Pearson's trusted content.

It doesn't give students the answer. It empowers them to tackle problems on their own and lays the groundwork for meaningful learning.

Our tool summarizes and simplifies complex material, breaks down related concepts step-by-step, and turns learning challenges into comprehension, so whether a student needs help with homework or with mastering a difficult concept, our tool is up to the task.

Studying at all hours is what students do. Helping them succeed is what we do.

Pearson's AI-Powered Study Tool. A teaching assistant that never sleeps.
