

get ready to inspire the next generation  
of Health Science Heroes with a  
groundbreaking immersive learning  
experience that brings health science to  
life like never before through  
interactive lessons engaging videos and  
Innovative web XR experiences students  
are no longer just learning about  
careers in health science they're living  
them Pearson's new immersive Health  
Science fundamentals course meets  
students where they are letting them  
dive into a day in the life of a mental  
health professional experience the world  
of an ER nurse and draw blood as a  
photomy technician all without leaving  
the  
classroom more than a career exploration  
course students start learning the  
foundation of Health Science careers  
including medical terminology human  
growth and development nutrition

controlling infections how to measure  
Vital Signs and patient and employee  
safety this course builds a foundation  
as as well as open students eyes to a  
wide range of in- demand careers there  
is a focus on application of on the- job  
skills and professional skills to  
prepare students for successful Health  
Science careers it's more than education  
it's a journey to finding their Passion  
by immersing themselves in what it feels  
like to be in the role students can  
begin to appreciate what it's like to  
work in a lab a clinic an emergency room  
or any number of healthcare settings  
plus easy easy to use tools Empower  
teachers to spend less time on grading  
and more time guiding students through  
their Journey this is how we're  
revolutionizing Health Science Education  
learn how you can bring this Innovative

program to your students because the  
future of healthcare starts here and it  
starts with them
