

0:06

Hi, Mississippi educators. My name is

0:07

Bryce Fagen. I'm Pearson's

0:09

representative here in Mississippi. I

0:11

just wanted to come on here and take a

0:12

moment and introduce myself as well as

0:14

share some exciting news with you. If

0:16

you weren't aware, the Mississippi

0:17

Department of Education recently

0:19

completed its 2025 science and career

0:22

technical education adoption. And I'm

0:24

thrilled to share that Pearson has 12

0:25

science titles and four CT titles are

0:27

officially adopted statewide. That

0:30

includes programs like Campbell's

0:31

Biology, which you may have heard of

0:32

already, introductory chemistry, human

0:35

anatomy and physiology, conceptual

0:36

physics and CT titles such as health

0:38

science fundamentals, and principles of

0:40

graphic design. Formally adopted by the

0:42

Mississippi Department of Education,

0:44

Pearson's science and CT programs align

0:46

to the state standards and workforce

0:48

priorities. This helps students build

0:50

those critical thinking, problem

0:52

solving, and career ready skills. We've

0:54

created a Mississippi specific adoption

0:56

page where you can explore more

0:58

including correlation and alignment

1:00

documents, scope and sequence guides,

1:02

and short over videos for each program.

1:05

I'm excited to see these programs come

1:06

to life in classrooms across the state

1:08

and look forward to connecting and

1:09

continuing the conversation. Thanks so

1:12

much for watching and congratulations to

1:14

all the educators supporting science and

1:15

CT learning in Mississippi.
