HOW TO ORDER

“Students need to be able to communicate in a global community... This understanding must be reflected in our English language teaching.”

GSE

When success in English means success in life, today's learners and teachers are ever more focused on clear progress and measurable results

We've worked with the world's leading academic specialists, as well as over 10,000 teachers, to develop the Global Scale of English (GSE), transforming the way we recognise, measure and monitor English language learning and levels.

The GSE underpins everything we do to support successful teaching and learning: in this catalogue you'll see how our resources and courseware are mapped and aligned to each stage of the scale.

“

The Global Scale of English represents the most significant advance in performance-based approaches to language learning, teaching and assessment since the development of the Common European Framework of Reference”

David Nunan Ph.D, Professor Emeritus of Applied Linguistics, University of Hong Kong

“

As I am creating the curricula for our intensive English institute, I have come to embrace and highly value the Global Scale of English as a department manager, as a creator of assessment tools, and for the sake of our teachers and students. This has had a huge impact on my selection of authentic textual materials.”

Marilyn Glazer-Weisner, Co-ordinator, World Language Institute, Middlesex Community College, Massachusetts, USA

- **learning 21st-century skills** to help them take on the world
- **Assessment for Learning**, because self-direction and confidence leads to success

- **challenged** with more complex texts, grammar and new vocabulary
- **engaged** with more authentic reading about topics they find interesting
- **confident** in taking exams

BIG SCIENCE

BIG SCIENCE students will:

- **learn English through Science**, providing context to their understanding of the language

"The concept of Big English was exactly what we wanted and we chose it because in addition to the system of English Language Learning in the curriculum content, it also focuses on the child's character, behaviour and other aspects to cultivate the comprehensive ability of the child. It also has amazing songs and provides a really good set of teaching materials."

Mario Herrera

Backpack and Backpack Gold have a perfect balance of physical, cognitive and emotional dimensions. The fact that students are always busy doing and saying things “about themselves,” either because they are expressing their thoughts about something, or impregnating facts with their reactions, issues with their feelings, and giving their touch to physical and creative activities, gives the process a personalized edge.

Steve Oakes

Speakout Author 2017

If, as teachers, we're preparing our learners to use English in the real world, much of what happens in the classroom needs to act as a bridge to that real world. Even at low levels learners need to develop not just the skills but also the strategies and the attitude to interact with language as it's actually used, and in a meaningful way, building on what one does understand, taking an achievement-oriented approach to self-expression, and not bogged down by the inevitable gaps in understanding and limitations in expression.

This is where authentic materials, relevant topics and personalized tasks come in; the learner learns to function 'inside' the language, rather than as an observer looking wistfully in from the outside. I see one of my key roles as a teacher to identify and use learning materials and classroom processes that help make all this happen.

Speakout

1st Edition

Antonia Clare, Frances Eales, Steve Oakes, JJ Wilson

Developed in association with BBC Worldwide and BBC Learning English, Speakout brings the real world into your classroom.

With its authentic material from the BBC, Speakout exposes students to language as it is really used, giving them confidence to communicate. Lessons cover all four skills, grammar and vocabulary. Each unit ends with a lesson based around an extract from a BBC programme which provides a springboard for speaking and writing tasks. Street interview videos filmed by the BBC also give students access to authentic English.

"It's a very exciting time to be involved in learning a language because there is just so much out there. The challenge is how to make sense of it. People realise the internet is out there and there's lots of English on it but it's very, very difficult for a student to find their way through that information. So what we tried to do is guide them carefully, so that a task becomes something manageable, do-able.

These are the kinds of skills people need nowadays and this is what people are doing - researching things on the internet, so the more we can connect the classroom material with the real world out there, the better."

Series Editor: Michael Rost

Now in its fourth edition, Contemporary Topics expands on its highly respected approach to developing academic listening and study skills. Organized around realistic college lectures, the text guides learners through carefully sequenced activities in skills such as note-taking, focusing attention, intensive listening, and vocabulary building. It also helps students evaluate their interests and explore possible career paths.

- Students are exposed to core academic vocabulary.
- Collaborative activities, presentations and peer evaluations help students develop critical thinking skills.
- Unit comprehension tests assess students' understanding of the lectures.

New to this edition:

- New subject areas, presented as one-on-one academic lectures, emphasize professional applications, such as software engineering, multimedia design, information technology, urban planning, and social psychology.
- Learning outcomes listed at the start of each unit show students the unit's goals and what they will learn.
- New audio interviews with experts provide context for unit lectures.
- Bottom-up listening and pronunciation exercises emphasize important principles and improve realtime perception.
- An oral presentation activity, with preparation and delivery support, at the end of each unit includes the opportunity for peer evaluation.
- Proficiency assessments simulate the TOEFL-style test with short academic audio lectures and multiple-choice exams.
- **Essential Online Resources** include audio, video, and teacher materials (assessments, teaching notes, answer keys, audioscripts, presentation points, and more).

...insight from cognitive science is the importance of presenting information in bite-size pieces. Breaking down exercises into shorter pieces or subtasks can help reduce the working memory load. Incremental step-by-step practice helps students absorb material better. Long grammar charts are useful references for teachers, but students benefit more from practicing fewer points at any one time.

Jeremy Harmer

ELT writer, presenter, teacher and trainer

However good an education system is, in the end it is the teachers who make the difference – who motivate their students, give them appropriate feedback on their progress and guide them to learn the things they need.

But who does this for the teachers themselves? Hopefully the place they work at and the development opportunities they are offered and take. But they need the help, support and knowledge of other professionals from across the English language teaching field too, and that is what these teacher resources aim to provide – a rich resource of ideas, suggestions, discussion and inspiration. That's what the material in this section of the catalogue offers, and I hope you will find something here to help you with your continuing journey through the exciting life of education.

Are you looking for a book to get a better understanding of teaching culture?
Do you want to take an online study course and gain a recognised certificate?
Or do you need a complete teacher training solution?

Here you'll find a wealth of experience available for you to read, watch and join in with online.

Don't forget you can also find more professional development ideas on the website.

**NO COPYING, SINGLE OR MULTIPLE, OF RECORDINGS IS PERMITTED.**

The law allows for a reader to make a single copy of part of a book for purposes of private study. It does not allow the copying of entire books or the making of multiple copies of extracts.

Under no circumstances may schools photocopy materials for use in self-access centres, unless they have registered with CLA or an associated licensing agency and allow/use photocopying strictly in accordance with their regulations. If a school wishes to have multiple copies of a part of a book in a self-access centre, then it must purchase the necessary number of printed books. There is no formal objection to schools physically cutting printed texts into parts and reassembling them in a way that seems appropriate, providing the books or parts of books are not then resold. It is not, however, a practice we would recommend.

In the case of audio recordings, it is permissible for a school to make a copy of an audio CD or file, keeping the original as a back-up. Only one copy may exist at any one time. As an example, a school may copy different parts of an original audio recording onto several CDs, providing that no part of the original exists in more than one copy at any one time. Therefore, if a school wishes to have three copies of one part of an audio recording, it must have three originals.

All the information contained in this catalogue is correct at the time of going to press (October 2017) and is subject to change without prior notice.

Where no CD-ROM specifications are given, please contact your local Pearson office.

Progress	126

We help learners at every stage of the journey discover a love of learning that will provide opportunities throughout their lives.

Helping improve access to better learning is an important part of this. With our global reach, we're big enough to make change happen on a global scale, and we're dedicated to doing the right thing and inspiring others to do the same.

Pearson is committed to creating positive social impact. Through a combination of ensuring the efficacy of our products and services, campaigns, sustainability and social innovation, we support causes and issues that help remove the barriers to achieving better learning outcomes.

Here are just a few:

Project Literacy

781 million people around the world can't read. At Pearson, we've started Project Literacy – a campaign to inspire new collaboration on the challenges and opportunities around people's ability to read and write.

Book Aid International

Books change lives, but not everyone has access to them. Pearson has been working with Book Aid International since 1980 to donate over 2.5 million books, including many of our primary titles.

Save the Children

Our partnership with Save the Children, Every Child Learning, helps out-of-school children caught in the Syrian refugee crisis to access quality education.

Since the start of Every Child Learning, we've committed £1 million to work with Save the Children on solutions for delivering education in emergencies, drawing on the expertise and assets of both our organisations.
