The **Contemporary Topics** series provides a comprehensive approach to developing 21<sup>st</sup> century academic skills and preparing students for participation in real-life academic and professional contexts. The overriding principle of language and skill development in the series is engagement. Authentic, stimulating content includes compelling lectures on a range of academic topics, and allows students to experience the value of exchanging ideas. Focused listening tasks, personalized discussions, challenging tests, and authentic presentation assignments enable students to explore each topic deeply. Activities in each unit are sequenced in a way that gives students increasing involvement and self-direction in mastering the skills they need to succeed—including listening, thinking, discussion, presentation, and study skills. *Contemporary Topics* bridges the gap between language-focused and content-focused instruction, based on an engaging nine-part methodology embedded in each unit:

**Section 1: Connect to the Topic** invites students to activate what they already know about the topic from personal experiences and beliefs.

**Section 2: Build Your Vocabulary** familiarizes students with some of the key content words and phrases used in the lecture. Each lecture targets 10–15 key words from the Academic Word List.

**Section 3: Focus Your Attention** provides specific coaching tips to help students direct their attention and gain more control of how they listen and how. Students learn strategies for listening actively and taking clear notes.

**Section 4: Watch the Lecture** allows for two full listening cycles, one to focus on “top-down listening” strategies (Listen for Main Ideas) and one to focus on “bottom-up listening” strategies (Listen for Details).

**Section 5: Hear the Language** provides “bottom-up” listening strategies and pronunciation guidance: students perform tasks to increase their listening skills.

**Section 6: Talk About the Topic** focuses on building discussion skills as an important part of academic success. Discussion strategies modeled and examined across the units include the following:

- Agreeing
- Asking for clarification or confirmation
- Asking for opinions or ideas
- Disagreeing
- Expressing an opinion
- Keeping a discussion on topic
- Offering a fact or example
- Trying to reach a consensus
- Paraphrasing

**Section 7: Review Your Notes** develops study skills related to using notes for review and discussion. Students are guided in reviewing the content of the unit, clarifying concepts, and preparing for the Unit Test.

**Section 8: Take the Unit Test and Proficiency Assessment** completes the study cycle of the unit: preparation for the lecture, listening to the lecture, review of the content, and assessment. Test taking skills include verbatim recall, paraphrasing, inferencing, and synthesizing information from different parts of the lecture.

**Section 9: Express Your Ideas** creates a natural extension of the unit topic to areas that are relevant. Students are guided through the process of preparing, practicing, and presenting on a topic of personal interest as well as on providing helpful feedback to other students’ presentations.

# The Global Scale of English and The Common European Framework of Reference

The Global Scale of English is a standardized, granular scale from 10 to 90 which measures English language proficiency. It is aligned with the Common European Framework of Reference (CEFR). Unlike the CEFR, which describes proficiency in terms of broad levels, the Global Scale of English identifies what a learner can do at each point on a more granular scale—and within a CEFR level. The scale is designed to motivate learners by demonstrating incremental progress in their language ability. The Global Scale of English forms the backbone for Pearson English course material and assessment.

CEFR and the Global Scale of English both comprise a number of Can Do statements, or “learning objectives,” for each of the four language skills, describing what learners should be able to do at different levels of proficiency. The learning objectives are written to reflect what a student “Can Do” with language without regard to the context in which a language skill may surface. The GSE Learning Objectives have been aligned to the CEFR, and many additional statements created, rated for difficulty, and calibrated to the scale. This document provides an overview of the learning objectives that are covered in each unit of the course. As the learning objectives focus specifically on language skills, some learning objectives will be repeated multiple times, a reflection of the fact that skills are built through practice in multiple contexts. For each learning objective we indicate whether a statement is from the original CEFR or newly created by Pearson English:

(C) Common European Framework descriptor, verbatim, © Council of Europe

(Ca) Common European Framework descriptor, adapted or edited, © Council of Europe

(N2000) North (2000) descriptor, verbatim

(N2000a) North (2000) descriptor, adapted or edited

(P) New Pearson English descriptor

*[Note: If a value is in parentheses, it indicates the learning objective is still undergoing research and validation, and therefore the value is a provisional estimate.]*
