

Fifty-Fifty Book 2: Unit 11 Worksheet (A)

IT'S NOT THAT BIG OF A PROBLEM

Look at the three types of problems in the chart below and fill it in with the problems in the box. One problem can be in more than one category. Add five more different problems to each category.

son is not good at school	want to be taller
don't like job	briefcase stolen
daughter breaks up with boyfriend	don't have any money
fly in soup ✓	father always complains daughter is out too late
lost wallet	always misplacing car keys

Minor Annoyances	Difficult to Resolve	Emotional
fly in soup		

Choose one problem from above. Write advice about the problem, including your reason for that advice.

Example: Fly in soup—You should send the soup back to the kitchen because the restaurant should replace it. Restaurants want their diners to be happy with their meal. They may also give you a discount on the bill or a free meal.
