

Pearson

We asked over 400 students from more than 40 different schools across Canada their thoughts on Mastering Chemistry.

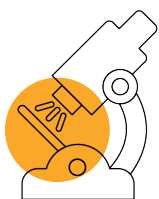

88% of students

indicated they would like to use Mastering in future courses.

87% of students

felt that Mastering chemistry provided the tools they needed to solve chemical problems.

88% of students

felt that Mastering contributed to their success in their chemistry course.

■ ■ *Mastering Chemistry was really helpful as it allowed me to study and practice what I learned in class. It allowed me to work with problems and understand how to solve them. Another great thing is the hint options which guided me through every problem if I was having difficulty solving them.* ■ ■
