

Master 4: Activity 2 Assessment

Comparing Length

| Comparing Objects by Length Behaviours/Strategies | | |
|--|---|---|
| Student does not line the pencil crayons up along a baseline. | Student visually compares the pencil crayons without measuring. | Student correctly orders the pencil crayons but compares each pencil crayon to all others. |
| Observations/Documentation | | |
| | | |
| Student correctly orders the pencil crayons but struggles to understand that the length of the pencils does not change when they are moved (conservation of length). | Student correctly orders the pencil crayons but has difficulty using measurement language to compare the lengths, widths, and heights of objects. | Student correctly orders the pencil crayons and uses measurement language to compare the lengths, widths, and heights of objects. |
| Observations/Documentation | | |
