

Master 19: Activity 10 Assessment

A Benchmark of One Metre

Estimating Behaviours/Strategies		
Student randomly selects objects much longer than or shorter than a metre.	Student shows anxiety about inaccurate estimates.	Student makes reasonable estimates.
Observations/Documentation		
Measuring Behaviours/Strategies		
Student uses the metre stick but does not line up the end of metre stick with the end of the object being measured.	Student slides the metre stick from one end of the object to the other so they share a common baseline on either end, maintaining they are the same length.	Student aligns the end of the metre stick with the end of the object being measured.
		
Observations/Documentation
