“I learned that anyone can teach with this technology.”

## Implementation

Heather Anderson teaches at the Seattle Central Institute of English:

- ▶ Academic track program, preparing international students for college courses.
- ▶ 6 levels of English are offered: lower levels focus on ESL, upper levels combine ESL and academic preparation.

Heather made the decision to integrate MyEnglishLab because technology was becoming ‘mainstream’ and she wanted to expose her students to modern methodologies. In addition to assigning MyEnglishLab homework 2-3 times per week, Heather also asked her students to continue working on their grammar skills in MyEnglishLab during her weekly one-hour lab session.

## Benefits / Results

Students work at their own pace. While some students may need the entire one-hour lab session to complete an activity, those who finish earlier can continue moving forward in MyEnglishLab.

Integrating MyEnglishLab saves Heather a lot of time, too. Before integrating the technology she spent a significant amount of time creating practice activities, worksheets, homework exercises, custom handouts and games. Now, Heather focuses her time on creating customized handouts and games and assigns MyEnglishLab’s wealth and variety of activities in place of the practice worksheets and homework.

## Conclusion

"I learned that anyone can teach with this technology. Many of us are hesitant to try it, feeling that they wouldn't know how to guide others through it.... However, this is not the case. There is no way to 'break' the program. Teachers can easily acclimate themselves to MyEnglishLab in a short amount of time."
