

Teacher's instructions Prepare photocopies for each student in advance. Hand out the worksheets. Give out a sheet of white paper and a sheet of green paper to each student. Demonstrate step by step how to make the lilies and have Ss follow along.

1. Have Ss put their hands on the white paper and trace round them.
2. Have Ss cut out the shape of their hands.
3. Have Ss glue the thumb and the baby finger together to make the petals of the lily.
4. Have Ss glue two halves together back-to-back. Fold back the tops of the fingers to make the tips of the petals.
5. Have Ss cut out some strips of green paper and roll them up to make the stems of the lilies. Have Ss attach these to their petals to make the completed lilies.

Have Ss make as many lilies as they like and give them to Mom as a special Mother's Day bouquet!
