- Thank her for the email.
- Say what your job title is and what you do.
- Say what you are doing at the moment.
- End the email politely.

Hi

My name is Cheung Lo and I'm looking forward to working with you on the new project. I'm the project coordinator and I work in the Marketing department in the Hong Kong branch.

At the moment I'm taking extra English lessons to help with our work!

Best wishes

Cheung

Then compare your answer with the suggested answer on page 92.
Read the article and choose the correct answer (a–c).

5. Mass production changed  
   a. the retail industry. 
   b. the service economy. 
   c. the manufacturing industries. 

---

The Economist

You’re hired!

Firms can give customers more control – and save money too

Meet your airline’s latest employee: you. You may not have noticed, but you are also now working for your phone company and your bank. Why? Because of the growth of the self-service economy in which companies are making the customers do the work. Self-service can have benefits both for companies and customers. It is already changing business practices in many industries, and seems likely to become even more widespread in future.

The idea is not new, of course. Self-service has been around for decades, ever since Clarence Saunders, an American entrepreneur, opened the first Piggly Wiggly supermarket in 1916 in Memphis, Tennessee. The idea is simple. Shoppers enter the store, help themselves to whatever they need and then carry their purchases to the check-out counter to pay for them. Previously, store clerks were responsible for getting items off the shelves; but with the arrival of the supermarket, the shoppers took on that job themselves.

Then came laundromats, cafeterias and self-service car washes, all of which were variations on the same theme. But now, with the rise of the web, companies are taking self-service to new levels. Millions of people now manage their finances, track packages and buy cinema and theatre tickets while sitting in front of their computers. They plan their own travel itineraries and make their own hotel and airline bookings: later, at the airport, they may even check themselves in. And they do all of this with mouse in hand and no human employees in sight. Self-service systems can save companies money and make customers happy.

This suggests that they could transform the service economy in much the same way that mass production transformed manufacturing, by allowing services to be delivered at low cost in large volumes. Though it may take five years before most transactions are conducted via self-service, we are definitely moving in that direction. So, you never know who you might be working for next.
