

# LESSON B

## Pre-Class worksheet

### Task 1: Talk to your partner about:

1. The last time you played a video game online.
2. The last time you uploaded something to the Internet.
3. The last time you chatted to someone online.
4. The last time you clicked on a link that took you to an interesting website.

### Task 2: Work with a partner and fill in the gaps. Check with another pair.

#### Digital World

December 2016

Free wi-fi is great! You can <sup>1</sup> \_\_\_\_\_ your emails, surf the internet and <sup>2</sup> \_\_\_\_\_ videos. But other people can use the same wi-fi network. If you aren't careful, hackers can see everything you are sending and typing on your gadget – passwords, bank account numbers and credit <sup>3</sup> \_\_\_\_\_ information. They can also send viruses and malware across the network.

It is important to protect yourself. You <sup>4</sup> \_\_\_\_\_ use public wi-fi safely if you are careful when you use the <sup>5</sup> \_\_\_\_\_ outside of your home. Here is some advice:

- <sup>6</sup> \_\_\_\_\_ use passwords on public networks.
- Always have a virus checker running.
- Use the settings on your gadget to turn <sup>7</sup> \_\_\_\_\_ folder-sharing.
- Try to only <sup>8</sup> \_\_\_\_\_ websites with HTTPS security. There are add-ons which can stop your gadget going to HTTP websites on public networks.

You can use these words to help you fill in the gaps:

1. Internet 2. card 3. check 4. off 5. can 6. watch 7. browse 8. Never

### Task 3: Discussion and Search Engine challenge

What is the difference between **'the Internet'** and **'the World Wide Web'**? Talk to your partner. If you do not know, look up the answer on the Internet!

### Task 4: Prepare your class answers

Your class is going to talk to another class. Prepare what your class will say by answering these questions together now.

1. What do you usually use the Internet for at school?
2. What do you usually use the Internet for at home?
3. What are your favourite websites you can recommend?
4. What is the best reason to use the Internet?
5. What advice can you give about staying safe on the Internet?
