

Fifty-Fifty Book 2: Unit 1 Worksheet (B)

WHEN'S MY TRAIN?

You are at a train station in Buffalo, New York and want to travel to Washington, D.C. You have just found out the trains are operating on a limited schedule, so you are going to have to wait for four hours. Read the information to complete the table below. Then answer the question.

IMPORTANT NOTICE

Because of construction, this train station will be operating on a limited schedule today. Only three international and three domestic trains will depart from the two platforms that are operating. The domestic trains will leave from Platform 20; the international trains will leave from Platform 35. The first train leaves Buffalo for Philadelphia at exactly 6:00 a.m. The first international train to depart, however, is the second train of the day. It leaves 50 minutes after the first domestic train. The last train to depart is the night train to Montreal. It takes 45 minutes less time than the day train to Montreal. Because of the additional stops, it takes one hour longer to get to Hartford than Washington, D.C. It takes half as much time to get to Philadelphia as Washington, D.C. The only night train leaves at a quarter to twelve and arrives at half past five the next morning. The first train of the day arrives at 7:30 in the morning. The train to Hartford arrives 70 minutes before the day train to Montreal arrives. The train to Toronto leaves 90 minutes after the day train to Montreal. It arrives in Toronto at noon. The train to Washington, D.C. arrives at quarter to nine at night.

Departure Order	Platform	Departure Time	Arrival Time	Journey Length	Destination
1		6:00 a.m.			
2	35				
3			12:10 p.m.		
4			noon		
5				3 hrs	.
6					Montreal

What time is it now? _____
