Water of the Earth

Did you know that water covers 70 percent of the Earth? Look at the blue parts on a map. Those blue parts are water.

Ninety-seven percent of the Earth’s water is saltwater. You can find saltwater in the oceans, seas and some lakes. Only 3 percent of the Earth’s water is fresh water. You can find fresh water in glaciers, ice caps, rivers, lakes and underground.

Water is very important. People use fresh water to drink, wash clothes and many other things. Many plants and animals live in water, too. In fact, more plants and animals live in water than on land!

Read and write.
