

MATHEMATICS

for the IB Middle Years Programme

AN INQUIRY-LED APPROACH

MYP YEAR

4 + 5

EXTENDED

Contents

Introduction

1. Year 3 review

- 1.1 Numbers
- 1.2 Algebra
- 1.3 Geometry
- 1.4 Probability and statistics

2. Year 3 extension

- 2.1 Classifying numbers and properties of numbers
- 2.2 Algebra extension

3. Relations and functions

- 3.1 Relations
- 3.2 Functions

4. Linear functions

- 4.1 Linear functions introduction
- 4.2 Graphing linear equations
- 4.3 Graphing linear inequalities
- 4.4 Parallel and perpendicular lines and absolute value

5. Systems of equations

- 5.1 Solving systems of equations by graphing
- 5.2 Solving systems of equations by substitution
- 5.3 Solving systems of equations by elimination
- 5.4 Linear programming

6. Matrices

- 6.1 Matrix algebra
- 6.2 Matrix multiplication
- 6.3 The inverse of a matrix
- 6.4 Systems of linear equations

7. Polynomial expressions, functions and equations

- 7.1 The graphs of $y = x^2$ and $y = ax^2$
- 7.2 Intersections of parabolas and straight lines
- 7.3 The graph of a quadratic function
- 7.4 Quadratic equations
- 7.5 Applications of the parabola
- 7.6 Cubic expressions and functions
- 7.7 Factorising polynomial expressions
- 7.8 Practical application of polynomials
- 7.9 Binomial expansions

8. Similarity

- 8.1 Similar shapes
- 8.2 Similar triangles
- 8.3 Similar triangles applications

9. Congruency

- 9.1 Equality and congruency
- 9.2 Congruent line segments
- 9.3 Congruent 2D shapes

10. Coordinate geometry

- 10.1 Distance and midpoint formulae
- 10.2 Transformations in the coordinate plane
- 10.3 Matrix transformations
- 10.4 Tessellations

11. Circle geometry

- 11.1 Circles review
- 11.2 Angle properties of circles
- 11.3 Chord properties of circles
- 11.4 Tangent properties of circles
- 11.5 Further circle properties I
- 11.6 Further circle properties II
- 11.7 Circles in a coordinate plane

12. Trigonometry

- 12.1 The intercept (Thales') theorem
- 12.2 The converses of Pythagoras' theorem
- 12.3 The tangent ratio
- 12.4 The sine and cosine ratios
- 12.5 Exact values of the trigonometric ratios for 30° , 45° and 60° angles
- 12.6 Angles of elevation and depression
- 12.7 Bearings

13. Inverse functions, exponentials and logarithms

- 13.1 Inverse functions
- 13.2 Exponential functions
- 13.3 Logarithms
- 13.4 Logarithmic functions and equations
- 13.5 Logarithms and power functions

14. 3D geometry

- 14.1 Points, lines and planes in 3D
- 14.2 Polyhedra
- 14.3 Surface areas of prisms and cylinders
- 14.4 Surface areas of pyramids and cones
- 14.5 Surface area of a sphere
- 14.6 Volumes of prisms and cylinders
- 14.7 Volumes of cones, pyramids and spheres
- 14.8 3D coordinate system

15. Trigonometric equations and applications

- 15.1 Trigonometric ratios on the unit circle
- 15.2 Trigonometric relationships between acute and non-acute angles
- 15.3 The sine rule
- 15.4 The cosine rule
- 15.5 Graphs of the sine and cosine functions

16. Rational and irrational expressions and functions

- 16.2 Rational numbers and functions
- 16.2 Irrational numbers

17. Sequences and series

- 17.1 From patterns to generalisations
- 17.2 Series and sigma notation
- 17.3 Arithmetic sequences
- 17.4 Geometric sequences
- 17.5 Arithmetic and geometric sequences

18. Probability

- 18.1 Probability review
- 18.2 Combined events
- 18.3 Conditional probability
- 18.4 Counting principles

19. Statistics

- 19.1 Collecting data
- 19.2 Organising and describing data
- 19.3 Representing and analysing data
- 19.4 Measures of dispersion: standard deviation
- 19.5 Analysing bivariate data

20. Discrete mathematics

20.1 Graph theory review: graphs, subgraphs and trees

20.2 Weighted and directed graphs

20.3 Graph algorithms

20.4 Introduction to number theory
