Who was Tutankhamen?

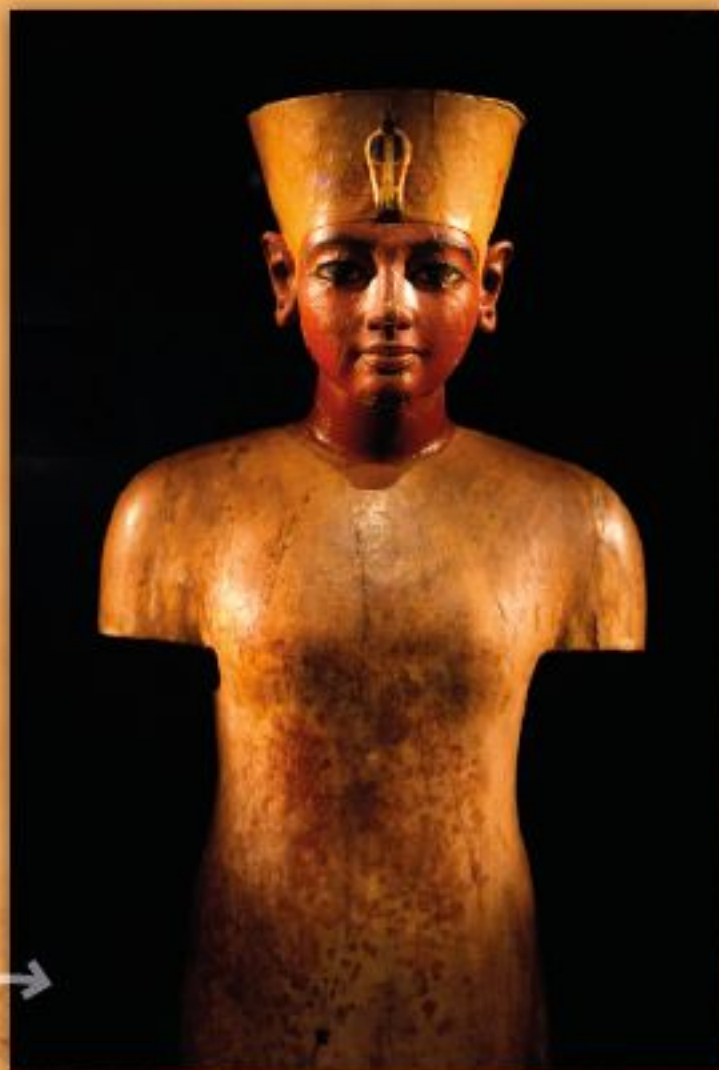

Do as you're told!

Being a boy king sounds great, but Tutankhamen still had to do as he was told. His advisers and guardians thought that controlling the Pharaoh was the best way of controlling Egypt for themselves.

As soon as he was old enough to rule on his own, Tutankhamen died very suddenly. The question is: did he have a terrible illness or was he killed?

The story of Tutankhamen

Tutankhamen became the Pharaoh of Egypt when he was just nine years old. Tutankhamen lived at a dangerous time. Egypt was going through religious changes and wars. Lots of people were killed.
