Pearson ELT Adult Education

Meeting the Challenges of Today's Adult Education

The **Workforce Innovation and Opportunity Act (WIOA)** places a priority on workforce, civic, and academic readiness at all levels and sectors of instruction, including adult English language acquisition programs. WIOA spells out a set of overarching program goals, including a greater emphasis on college and career preparation, technology integration in instruction, and cooperation and joint programming with employment training providers.

In this WIOA landscape, ESL programs need not only to help learners develop competence in reading, writing, speaking, and comprehension, but also develop the skills they will need to transition to postsecondary education or advance in their careers.

At Pearson, we understand that for English language learners to take full advantage of today's career and educational opportunities, they need to possess skills to understand complex language, read and process challenging texts, think critically, and problem-solve, as well as analyze concepts and apply them to new contexts.

In order to meet the WIOA educational goals, Pearson English adult education products are carefully aligned with the CCR and ELP standards, as well as the NRS educational functioning levels and the new Integrated English Literacy and Civics standards, to help adult learners achieve their educational, career, and life goals.

Digital skills are key to success

The WIOA's program goals require programs to integrate technology in instruction, recognizing that digital skills are essential to success. To meet the WIOA technology requirements, Pearson ELT adult English programs incorporate multimedia tools and technologies to help learners develop their visual and digital literacies. Our online and mobile tools offer flexible solutions for classroom instruction, blended and distance learning, and practice on the go.

The Global Scale of English Alignment to the Employability Skills Framework

The **Employability Skills Framework**, developed by the U.S. Department of Education's Office of Career, Technical, and Adult Education, is designed to support educators in understanding the skills necessary for students to be successful in the workplace and in their career pathways.

The **Global Scale of English (GSE)** is a standardized granular scale that measures English language proficiency. It identifies what learners can do at each level and demonstrates incremental progress in learners' language abilities.

The GSE forms a backbone for Pearson course materials and assessment.

An extensive research has been done to establish the relationship between the GSE and other scales and reference frameworks, such as NRS and CASAS.

And now the GSE is also aligned to the Employability Skills Framework to help educators in developing curricula that support language development with an emphasis on transference of high value skills for future employment.

Step Up

Skills for Employability

Step Up is a flexible online course designed for adults or young adults who want to improve their employability skills – whether to get a first job, secure a promotion, find a different job, re-enter the workforce after an absence, or change fields. Although the emphasis of the course is on employability skills, **Step Up** also develops English language skills by providing vocabulary instruction and practice, listening, reading, and notetaking skills, pronunciation practice, and discussion strategies.

Two Versions of Step Up

Students can study the **Step Up** course in two ways: as a self-study course or as a self-study plus course, which is the self-study course combined with a teacher-led class.

As a self-study course, each level of **Step Up** takes students 18 hours to complete, though this may vary as it is self-paced. The teacher-led course provides 14 hours of class time, with additional resources and extension activities available in the Teaching Notes, which would extend class time.

English For Academic Purposes

Let's focus on skills for success

Language learning is not a 'one size fits all' process. Learners have different strengths and weaknesses, and different goals. Pearson's skills titles have been created so that teachers and learners can be confident they are focusing on the right skills at the right level.

What English is needed for academic purposes?

Authors, editors and teachers are aware of the need to be learner focused and to create syllabuses and courses that reflect learner needs and expectations. The GSE Learning Objectives for Academic English constitute a detailed and graded model of student target performance across a range of skills and domains relevant to the study of English for Academic Purposes.

English
For Academic
Purposes

Let's get to grips with grammar

In choosing the best book for your class, consider purpose and method

Choosing the Right GRAMMAR Book

Wherever you teach, choosing the best textbook for your class means considering two things: your students' **purpose** for studying English, and your preferred **method** for teaching language.

PURPOSE

Why are your students studying English?

ACADEMIC ENGLISH

VS

GENERAL ENGLISH

Some students' goals center on **Academic English**. They want to learn how to read and write academic texts and how to understand what they hear in the classroom and participate themselves.

Other students want more **General English**. They need to read, write, listen, and speak in a wide variety of contexts — everything from work to daily life.

METHOD

How do you prefer to teach language?

GRAMMAR-BASED

VS

CONTEXTUALIZED

Many teachers use a **Grammar-based** approach. They use grammar as the starting point and then build lessons around it. The grammar "drives" the development of language skills (reading, writing, listening, and speaking).

Just as many teachers prefer a **Context-based** approach. They choose relevant and engaging topics, then teach grammar and language skills through context situations.

In choosing the best book for your class, consider purpose and method

Choosing the Right READING Book

Wherever you teach, choosing the best textbook for your class means considering two things: your students' **purpose** for studying English, and your preferred **method** for teaching language.

PURPOSE

Why are your students studying English?

ACADEMIC ENGLISH

VS

GENERAL ENGLISH

Some students' goals center on **Academic English**. They want to learn how to read and write academic texts and how to understand what they hear in the classroom and participate themselves.

Other students want more **General English**. They need to read, write, listen, and speak in a wide variety of contexts — everything from work to daily life.

METHOD

How do you prefer to teach language?

SKILLS-BASED

VS

CONTENT-BASED

Many teachers use a **Skills-based** approach. They start with a set of skills that students need to acquire and then build lessons around these skills.

Just as many teachers prefer **Content-based Instruction**. They choose relevant and engaging topics and then teach the language through this context.

NorthStar

Reading & Writing

5th Edition

NorthStar 5th Edition* is an integrated-skills English course that empowers adult and young adult English language learners to achieve their academic and personal goals. Engaging content, integrated skills, and critical thinking continue to be the touchstones of the series.

NorthStar continues to be rigorous in its approach to critical thinking by systematically engaging students in tasks and activities that prepare them to move into high-level academic courses. The cognitive domains of Bloom's Taxonomy provide the foundation for the critical thinking activities. The Reading & Writing strands are designed to challenge students to move beyond basic comprehension to higher-level analysis.

New to this Edition*

- **New and updated content** with a new theme keeps students motivated. Current and thought-provoking readings from a variety of contrasting genres stimulate students intellectually and encourage personal expression and critical thinking.
- **Learning outcomes** are created using the Global Scale of English (GSE) so students can see their progress more easily. Learning outcomes are present at the opening and closing of each unit to clearly mark what is covered in the unit and encourage both pre- and post-unit self-reflection.
- **Note-taking** is a skill in every unit. Grounded in the foundations of the Cornell Method of note-taking, the new note-taking practice is structured to allow students to reflect on and organize their notes, focusing on the most important points.
- **Scaffolded critical thinking activities** are clearly marked to help students develop their academic skills. Activities within the unit are structured to follow the stages of Bloom's Taxonomy from **remember** to **create**.
- **Academic Word List words** are highlighted to help students identify essential vocabulary.
- New and updated activities in **MyEnglishLab** provide additional practice online.
- **Pearson Practice English App** allows students to complete activities, listen to audio, and watch video on the go.
- **ExamView Test Generator** allows teachers to customize assessments.

Let's focus on skills for **success**

In choosing the best book for your class, consider purpose and method

Choosing the Right WRITING Book

Wherever you teach, choosing the best textbook for your class means considering two things: your students' **purpose** for studying English, and your preferred **method** for teaching language.

PURPOSE

Why are your students studying English?

ACADEMIC ENGLISH

VS

GENERAL ENGLISH

Some students' goals center on **Academic English**. They want to learn how to read and write academic texts and how to understand what they hear in the classroom and participate themselves.

Other students want more **General English**. They need to read, write, listen, and speak in a wide variety of contexts — everything from work to daily life.

METHOD

How do you prefer to teach language?

SKILLS-BASED

VS

CONTENT-BASED

Many teachers use a **Skills-based** approach. They start with a set of skills that students need to acquire and then build lessons around these skills.

Just as many teachers prefer **Content-based Instruction**. They choose relevant and engaging topics and then teach the language through this context.

University Success Writing

University Success Writing is designed for English language learners preparing for mainstream academic environments. A flexible three-part approach systematically builds skills tied to specific learning outcomes along with authentic writing strategies from top Stanford University professors. A strong focus on critical and creative thinking prepares students to approach writing assignments in different disciplines and write in academic degree classes. The Writing stand supports students through the writing process and moves them away from the production of highly structured essays.

- Each part is a self-contained module allowing teachers to focus on the highest-value skills and content. Topics are aligned around science, technology, engineering, arts, and mathematics (STEAM) content.
- Parts 1 and 2 include presentation and controlled writing practice that guide students through the writing process while building their essential writing and critical thinking skills.
- Part 3 includes interviews with professors discussing their own writing processes. Assignments allow students to apply and expand the skills acquired in Parts 1 and 2.
- Additional online skill and vocabulary practices, collaboration activities, and assessments.
- Strategies for academic success and soft skills delivered via online videos.
- NEW! You can now create unique custom University Success content packs with Pearson Collections (see page 17). Contact your ELT rep for details.

Focus on Writing

Focus on Writing is an academic writing program that provides students with essential tools to master not only the key steps in the writing process, but also the grammatical structures, lexical knowledge, and rhetorical modes essential for academic writing.

This five-level series progresses with students as they grow in confidence and ability from sentence level (Book 1) through paragraphs (Books 1–3) and essays (Books 3–5). Each unit leads writers step-by-step through the process of prewriting, writing a first draft, revising, and editing before producing a final draft. Not only do students write an entire paragraph or essay in each unit, they also get plenty of practice at the sentence and word levels.

- Each unit teaches students how to use one or more common organizational structures: narrative, description, opinion, persuasion, comparison-contrast, problem-solution, and cause-effect.
- Revision and editing checklists for each writing assignment help students rewrite and polish their first drafts.
- **Online Teacher's Manuals** contain model lesson plans, unit overviews, timed writing assignments, authentic student models, and answer keys.

NorthStar continues to be rigorous in its approach to critical thinking by systematically engaging students in tasks and activities that prepare them to move into high-level academic courses. The cognitive domains of Bloom's Taxonomy provide the foundation for the critical thinking activities. The Reading & Writing strands are designed to challenge students to move beyond basic comprehension to higher-level analysis.

New to this Edition*

- **New and updated content** with a new theme keeps students motivated. Current and thought-provoking readings from a variety of contrasting genres stimulate students intellectually and encourage personal expression and critical thinking.
