THE IMPACT OF SMALL GROUP ONLINE TUTORING

An analysis based on over 42,000 hours of online tutoring and 3,000 assessments delivered by Pearson via Bramble as part of the National Tutoring Programme in AY 2020/21.

https://www.pearson.com/uk/educators/schools/pearson-tutoring-programme.html
https://about.bramble.io/
**THE IMPACT OF SMALL GROUP ONLINE TUTORING – EXECUTIVE SUMMARY**

This report looks at the impact of 42,000 hours of small group online tutoring delivered to 9,100 students by Pearson via Bramble as part of the UK’s National Tutoring Programme in the 2020/21 academic year. It combines Pearson assessment data for 1,520 students with a wealth of data from Bramble.

**KEY FINDINGS**

- Pre and post tutoring assessments showed that on average – across all subjects, ages and regions – students increased their scores by two thirds (67%).
- Younger students made more progress: a 72% increase at KS2 vs 59% at KS4.
- The greatest progress was made in maths, with an average increase of 88% across all ages and regions – albeit starting from a lower baseline than English.
- KS2 maths students receiving pupil premium doubled their assessment scores before and after tutoring.
- West Midlands students made the greatest progress (91%), drawing level with London students who made the least (49%), albeit from the highest baseline.
- The most tutoring was delivered in London: 8,558 hours. This was 8x the least, with 1,061 hours delivered in the North East.
- Although a small sample, the tutoring that was delivered in the North East did appear to have significant impact – with a 69% increase in scores.
- Students were generally highly engaged, with tutors reporting an average engagement score of 82%.
- Student confidence, as reported by their tutors, increased by 18% between their first and final tutoring sessions.
- The most tutored topics in maths were: number (44% of maths sessions), algebra (15%) and geometry (13%).
- Within number, the most tutored subtopics were: structure + calculation (16%), fractions, ratios + percentages (11%) and numeracy (10%).
- The most tutored English subtopics were: language + structure (19%), creative writing (18%) and grammar (17%).
- Chemistry was the most tutored science (42% of science sessions), followed by biology (27%), physics (24%) and combined science (7%).
THE IMPACT OF SMALL GROUP ONLINE TUTORING – INTRODUCTION

The data in this report is from small group online tutoring sessions delivered by Pearson via Bramble in the first year of the UK’s National Tutoring Programme (NTP). Students typically received 15 one hour sessions of live online tutoring in a specific subject: English, maths or science. These sessions were usually delivered in small groups with three students and one tutor in each session. This report looks at data from four sources.

1) PEARSON ASSESSMENT DATA
Students were set a topic based assessment before and after their tutoring programme. We can calculate progress for students who complete a pre + post assessment.

2) BRAMBLE AI SUBTOPIC DETECTION
Bramble’s Smart Subtopic detection technology uses AI trained on 1.5 million hours of live online tutoring to automatically detect the subject, topic and subtopic being taught in a session.

3) BRAMBLE ENGAGEMENT DATA
Every session on Bramble generates thousands of engagement data points: from words spoken and annotations drawn through to resources shared.

4) BRAMBLE CUE RATINGS
Tutors rate student confidence, understanding and engagement after each session to provide further insight on the progress made.

Learn more at https://about.bramble.io/
GUIDE TO INTERPRETING THE DATA

1) Percentage increase in assessment score calculated by dividing the difference between pre assessment and post assessment by the pre assessment score = (post-pre) / (pre).

2) Comparing the increase across different cohorts: Key Stage 2 students not receiving pupil premium (KS2 PP N) vs Key Stage 2 students receiving pupil premium (KS2 PP Y).

3) Sample sizes for the different cohorts. 67% was the average progress across all 1,521 students who completed both assessments.

4) Breakdown of the subjects, topics and subtopics taught in sessions by % as autodetected by Bramble’s Smart Subtopics. 7.3% of sessions = maths > number > structure + calculation. 6.4% of sessions = English > writing > creative.

5) Visualising pre and post assessment scores: (5) shows the average pre test score for all students in the East Midlands.

6) Visualising pre and post assessment scores: (6) shows the average post test score for all students in the East Midlands.

7) The increase in assessment scores as calculated in (1). This visualisation highlights that the greater increase in the West Midlands vs London was partly due to lower starting scores.

8) Mapping increases to the NUTS 1 statistical regions across which tutoring was delivered.
THE IMPACT OF SMALL GROUP ONLINE TUTORING – PROGRESS + CONTENT

An analysis based on over 42,000 hours of online tutoring and 3,000 assessments delivered by Pearson via Bramble as part of the NTP AY 2020/21. Content insights provided by Bramble’s Smart Subtopic detection technology.

67%
Increase in assessment scores before and after tutoring across all subjects, key stages and regions.

Breakdown of topics and subtopics

| KS2 (PP N) | 74% |
| KS2 (PP Y) | 67% |
| KS4 (PP N) | 60% |
| KS4 (PP Y) | 57% |

Students assessed = 1521.

The Impact of Small Group Online Tutoring – Engagement + Reach

An analysis based on over 42,000 hours of online tutoring delivered by Pearson via Bramble as part of the NTP AY 2020/21.

155,000,000 Words spoken in sessions
17,000,000 Strokes drawn
3,700,000 Texts typed
480,000 Resources shared

9,100 Students reached
1,520 Students assessed
75,400 CUE Ratings

M = 717 students assessed. E = 654. S = 150.

88% increase in maths
51% increase in English
74% increase in science

70% average confidence
73% average understanding
82% average engagement
The greatest progress was made in maths, with KS2 PP students doubling their assessment scores pre and post tutoring. In part, this was due to the low baseline scores for maths. That contrasts with English, where final scores were higher but from a much higher base.
The greatest increase in assessment scores was **91% in the West Midlands**. Students there started with the lowest scores but finished level with London and behind only the East Midlands. London's smaller increase was partly driven by higher starting scores.

The impact of small group online tutoring – reach by region

Whilst significant progress (69%) was made by students in the North East, reach was limited to 1,060 hours. This contrasts with London, which saw the most hours at 8,560 yet the smallest relative progress (49%) due to a higher baseline.

NE = 47 students assessed, NW = 216, Y = 179, EM = 117, WM = 132, E = 226, L = 298, SE = 188, SW = 118.
The Impact of Small Group Online Tutoring – CUE by Region

Tutors are asked to rate student confidence, understanding and engagement after each session on Bramble. These CUE Ratings allow us to compare averages between regions and also observe the increase in confidence, understanding and engagement that occurs over a block of tutoring.

70% Confidence Average
18% Confidence Increase

73% Understanding Average
13% Understanding Increase

82% Engagement Average
6% Engagement Increase

Analysis based on 75,400 CUE Ratings
**The Impact of Small Group Online Tutoring – Maths**

The greatest progress was made in maths, particularly with younger students. **KS2 students** receiving pupil premium more than doubled their assessment scores before and after tutoring. 44% of maths sessions focused on number, 15% focused on algebra.

88%

Increase in assessment scores before and after maths tutoring across all key stages and regions.

The Impact of Small Group Online Tutoring – Maths Content Insights

Bramble's AI powered Smart Subtopic detection provides unprecedented insight into what topics and subtopics students are covering in their tutoring. It shows that in maths students spent more time working on fractions than solving algebra equations – 11% of maths sessions covered fractions.

The Impact of Small Group Online Tutoring – Maths Topic Progress

Combining Bramble’s Smart Subtopics with the Pearson assessment data gives us a preliminary look at the progress students made in different topic and subtopic areas. At KS4, the most progress was made in number. At KS2, we can interrogate the progress in the subtopics under number.

At KS4, the maths topic that saw the greatest increase was number – assessment scores doubled before and after tutoring.

- KS4 Maths > Geometry = 26 students assessed.
- KS4 Maths > Algebra = 32.
- KS4 Maths > Number = 37.

At KS2, the most popular topic was number. Within number, the subtopic with the greatest progress was structure + calculation.

- KS2 Maths > Number > Numeracy = 59.
- KS2 Maths > Number > Fractions = 55.
- KS2 Maths > Number > Structure = 58.

</table>

The impact of small group online tutoring – English

There was smaller relative progress in English, which was partly driven by higher starting scores compared to maths and science. Once again, we see greater progress with younger students. There was a fairly even split between sessions focusing on writing (44%) vs reading (41%) but interesting to see creative writing account for 18% of English lessons.

51%

Increase in assessment scores before and after English tutoring across all key stages and regions.

| English KS2 (PP N) | 60% |
| English KS2 (PP Y) | 49% |
| English KS4 (PP N) | 39% |
| English KS4 (PP Y) | 29% |

THE IMPACT OF SMALL GROUP ONLINE TUTORING – ENGLISH CONTENT INSIGHTS

Bramble’s AI powered Smart Subtopic detection provides unprecedented insight into what topics and subtopics students are covering in their tutoring. It shows that in English there is more focus on creative writing than transactional: 18% of English sessions were on creative writing vs 6% on transactional.

English

### Combined Science
- 7.3%
THE IMPACT OF SMALL GROUP ONLINE TUTORING – NORTH EAST

By far the least tutoring was delivered in the North East – the next lowest regions had three times the hours. That makes for a small sample but the tutoring that was delivered appeared to have considerable impact, especially for KS2 maths students who more than doubled their scores.

- **1,061 hours**
- **224 students**
- **69% progress**

**CUE AVERAGES**
- Confidence: 71% (11% increase)
- Understanding: 75% (8% increase)
- Engagement: 82% (7% increase)
