Policy Watch

Your guide to what’s happening in the world of education

The week in a nutshell

This week the Industry and Regulators Lords Committee held the first session of their inquiry into the work of the Office for Students (OfS). Peers heard from Dame Nicola Dandridge (former Chief Executive of the OfS), and Sir Michael Barber (its former Chair), about the establishment, role and remit of the OfS, and its relationships with government and HE institutions. Another further session is set for Tuesday 14 March, with ex-Ministers, Charles Clarke and Lord Johnson of Marylebone.

The Department for Education (DfE) and Education and Skills Funding Agency (ESFA) published various guidance documents pertaining to 2023 -2024 funding this week. ESFA documents include: methodology for establishing maximum amounts for advanced learner loans designated qualifications; advanced learner loans funding and rules; the rules that apply to ESFA funded adult education budget (AEB) provision; and information about local authority education funding and expenditure plans.

Top stories

DfE publishes Lifelong Loan Entitlement consultation response

- The DfE published its response to last year’s consultation on the Lifelong Loan Entitlement, following the second reading of the Lifelong Learning (Higher Education Fee Limits) Bill in Parliament last week. Notable elements of the response include:
  - People up to age 60, including returning students, will be entitled to the LLE, equivalent to £37,000 in today’s fees.
  - The “Equivalent or Lower Qualification (ELQ) exception rule” will be removed, enabling people to be funded to study at an equivalent or lower level than their existing qualifications to facilitate reskilling.
  - To put technical study on a par with academic routes, maintenance support will be expanded to be offered across all eligible technical and part-time courses the LLE will fund.
  - Higher Technical Qualifications will also be funded through the new system.

DfE to defer delivery of three T Levels

- The Department for Education has said in a written ministerial statement that it will defer first delivery of three T Levels in Hairdressing, Barbering and Beauty Therapy; Craft and Design; and Media, Broadcast and Production from 2023 to 2024.
- They have also decided to defer the Catering T Level beyond 2024, to allow time to consult with employers and sector bodies, and will provide an update on the rollout timetable of this T Level in due course.
- The Department also published a new T Level Action Plan 2022/23, which provides information on T Level starts, student characteristics, providers, placements, and progression.
OfS confirms new HE funding

- The Office for Students (OfS) has confirmed £16m of recurrent funding to expand the development and delivery of HE qualifications, of which £8m will support the development of Level 6 degree apprenticeship training programmes and £8m to increase the provision of Level 4 and 5 qualifications.

- The regulator also announced it is awarding £9.6m in funding to improve teaching and access to performing arts courses at specialist HE providers across England, intended to improve access and teaching resources for contemporary music, drama and dance courses.

The Sutton Trust publishes research on private tutoring

- The Sutton Trust has published new research providing a detailed picture of trends in the use of private tutoring, as well as the extra tuition offered by schools in the wake of the pandemic.

- The report also provides an overview of the National Tutoring Programme (NTP) and how it has been delivered to date, concluding that the early focus of the programme on quality provision was drowned out by an overriding objective to scale up. The researchers say this must be rebalanced towards quality, to ensure value for money and effectiveness of in-school tutoring going forward. Other findings include that:
  - 30% of young people aged 11-16 report having had private tutoring, up from 27% pre-pandemic, and the joint highest figure since the time series began in 2005.
  - Black and Asian pupils were more than twice as likely to have ever received private tutoring (50% and 55%), compared to white pupils (24%). 46% of pupils in London had received private tutoring, compared to 30% for England as a whole.
  - 24% of young people report receiving tutoring from their school in the 2021/22 school year, up from 18% in the previous year. Most of this is in the form of small group tutoring (20% of pupils in 2021/22), compared to 7% one-to-one.

- The full report, including recommendations for government and schools, is available here.
