

Pearson

MyLab

December 2019 Release

The features included in this release document will be available for Pearson MyLab products for higher education only, and may vary in availability by discipline.

Make it personal.

This December, MyLab introduces new features and functionality that will **make it even easier to personalize** your course to meet the unique needs of you and your students.

With a few simple steps, you can create new **custom assignment categories**, adjust the **student homepage calendar view**, apply **at-a-glance color coding** across your courses, and more.

Easily manage your gradebook with additional categories.

Custom assignment categories allows instructors to **add categories with customized weights**. For example, a mid-term or final exams can now be classified as such, and weighted accordingly.

With this new functionality instructors can more easily manage a full course gradebook within MyLab. For those using an LMS gradebook, the MyLab score can be made to more closely mirror students' overall course grade as well.

Category Name	Weight
Homework	10
Recitation	5
Quiz	15
Pop Quiz	5
Test	20
Midterm	15
Final Exam	20
Study Plan	0
Attendance	5
Participation	5
Total	100

Total				110 pts		

* Coordinator/Member course functionality is supported

* Export is not supported at this time

Help students stay on track.

The MyLab **student homepage** has a **simplified, fresh** look to help students stay up to date and quickly access their assignments.

Added **calendar flexibility** allows instructors to customize the view to best fit their course format – adjustable to a week, two week, or month view.

The screenshot displays the MyLab student homepage for the course "Math 1100 - Spring 2019". The interface includes a top navigation bar with icons for a document, a laptop, a question mark, and a settings gear. A progress indicator shows 80% completion. Below the course title, there are tabs for "Current" and "Entire Course to Date". A calendar view for May 2019 is shown, with a "Today" button and a "2 weeks" view selector. The calendar grid shows dates from 5 to 18, with various icons indicating assignments or events. Below the calendar, there are sections for "Announcements (1)", "Past Due Assignments (1)", and "Current Assignments (5)".

SUN	MON	TUE	WED	THU	FRI	SAT
5	6 ✓ ✓	7 📅 ⌚	8 📅 📌	9	10 ●	11
12	13	14	15 📅	16	17 ●	18

MAY 7	● Mathematical Models	DUE YESTERDAY	Score: 0%	3 attempts available	Completed: 0 of 10

Current Assignments (5)

DATE	ASSIGNMENT	DUE	SCORE	ATTEMPTS	COMPLETED
TODAY	📅 Quiz 1	DUE AT 9:00 AM	Score: 100%	1 attempt available	Completed: 10 of 10

Customize your My Courses page.

The **color theme** instructors choose inside their MyLab course will now carry over onto the main My Courses page, allowing instructors and students to quickly identify a specific course among a list of courses.

Meet the needs of students, in groups.

This December, instructors can **apply custom assignment settings to specific student tags**, making it easier to address the unique needs of designated groups of students.

Functionality evolution:

- *Student and Assignment Tagging, introduced in December 2018, allowed instructors to better manage their diverse classroom of students.*
- *Continued updates in June 2019 enhanced the experience of tagging from within an assignment, omitting tagged assignments from overall scores, and to create exports based on specific tags.*

International Date Format

Customize the displayed date format

U.S. date conventions have caused some confusion with assignment due dates and communications with students in the past.

In June 2019, we introduced a minor enhancement to help educators and students better interpret when assignments were available and due.

With the December 2019 release, instructors will now be able to choose the format in which dates appear in their MyLab course.

The screenshot displays the 'Course Availability' and 'Time Zone' settings in a MyLab course. The 'Course Availability' section has two radio button options: 'This course is available to students' (selected) and 'This course is NOT available to students'. The 'Starting' date is 10/29/2019 and the 'Ending' date is 06/29/2020. The 'Time Zone' is set to '(UTC-05:00) Eastern Time (US & Canada)' with a current course time of 5:05pm. The 'Date Format' dropdown menu is open, showing 'MM/DD/YYYY' as the selected option and 'DD/MM/YYYY' as an alternative. The 'Copying' section has an unchecked checkbox for 'Allow other instructors to copy this course.'.

Improved Reporting Experience

Instructors using Pegasus-based MyLabs, including MyLab IT and MyLab Languages, now have the ability to enable an updated reporting experience. With this release, instructors can choose to access:

- An all-new Reports page that offers improved performance and simpler filtering options.
- A new Dashboard page that displays report data at a glance.
