## Short description

Adapting Early Childhood Curricula for Children with Disabilities and Special Needs uses a developmental focus, rather than a disability orientation, to discuss typical and atypical child development and curricular adaptations. The integrated, non-categorical approach assumes that children are more alike than different in their development. The inclusive focus assumes that attitudes, environments, and intervention strategies can be adapted so that all young children with disabilities or other special needs can be included. An essential text for today and a valuable resource to take into the classroom tomorrow, this practical guide provides daily activities and realistic lesson modifications that help facilitate truly inclusive classrooms. Aspiring educators will also learn to develop their collaboration and problem-solving skills in supporting every child's positive development.

## Short description

A comprehensive look at the key theoretical principles, concepts, and research findings about learning, with special attention paid to how these concepts and principles can be applied in today's classrooms.

This widely used and respected resource introduces readers to the key theoretical principles, concepts, and research findings about learning and helps them see how to apply that theory and research as educators. Learning Theories begins with a discussion of the relationship between learning theory and instruction. It then looks at the neuroscience of learning. Six chapters cover the major theories of learning – behaviourism, social cognitive theory, information processing theory, cognitive learning processes, and constructivism. The following three chapters cover key topics related to learning – motivation, self-regulated learning, and contextual influences. And the final chapter, Next Steps, helps students consolidate their views about learning. The 8th Edition has been significantly updated with a number of new features and the most current thinking and research.

## Short description

For students taking courses in substance abuse and addictions counselling. A practical collection of tools and strategies for prospective addictions counsellors that includes a solid foundation of research, theory, and history. Practical and comprehensive, Foundations of Addiction Counseling explores an array of techniques and skills that a new practitioner will need in the real world while providing a thorough review of the research, theory, and history of addiction counselling. With chapters written by expert scholars, this text covers many topics in depth often ignored by other comparable books, such as cross-cultural counselling, gender issues in substance use, working in rehabilitation centers, and working with clients with disabilities.
