

# Live Response:

## Deepen student understanding and engagement

---

Live Response is a classroom response system that promotes active learning and participation in any course.

Engage your students by posing a variety of question types that check and deepen comprehension in any subject.

You can also group your students and deliver questions that facilitate collaboration. Students then respond using their own smartphones, tablets, or laptops. Without saying a word, they're able to quickly tell you when they do — and don't — understand.

At the same time, your students are learning what they know and where they need help.

You can monitor student responses with analytics to see exactly where they're struggling.

Are they stuck on a concept? Remediate on the spot and resend tough questions for students to tackle individually or in groups.

Take your students to the next level of learning with Live Response.
