

# Bring concepts to life with MediaShare

---

MediaShare brings course concepts to life through video, audio, and other media.

This online and interactive environment makes it easy for you and your students to share, discuss, and assess course work.

Video quizzes engage students with what they're watching.

And because questions are time stamped, you can see exactly which concepts they've mastered and which ones they're struggling with.

Students can also analyze and comment on assigned media.

Or they can create and share videos of themselves for feedback.

Time-stamped comments help students see exactly what they're doing well and what they need to work on.

With MediaShare, you can teach students to think critically and speak confidently about big ideas -- both in and outside of the classroom.
