## Collect. Crunch. Communicate.

---

StatCrunch is a powerful, web-based statistical software that has everything you need to bring statistics to life with real data.

Collect data using surveys, upload your own data, or browse a library of shared data sets from a community of StatCrunch users.

Analyze your data using over 90 statistical procedures—from summary statistics to interactive graphs.

Finally, give those visuals meaning by communicating your results with robust reporting tools.

Available in MyLab Statistics or on its own, StatCrunch brings course concepts to life.

Collect, crunch, and communicate with real data — all in one place with StatCrunch.
