Welcome! Your instructor has chosen course materials to help you be a more successful reader.

To get started using Strategic Reader, you must have a unique course link from your instructor. You can either sign in with existing Pearson credentials or create a new Pearson account. You will need an access code from your student bookstore, or you can purchase access online.

Once you are registered and sign in, you will see your home screen.

Complete “Starting Off,” and then, move on to the other modules.
Scroll down and click **Lesson** to get started.

You will see your objectives listed, and you can access short videos and
information clips to help guide you.

You will be prompted to complete activities such as viewing the video, before continuing onto additional material.
As you work, the Progress Dashboard will help you monitor your development as a reader.
