

Your students.

When it comes to their assigned readings,  
you never know what you're going to get.

Sure, their lives take them in  
1,000,000 different directions,

but often they miss readings  
because the material isn't engaging

or they have trouble understanding it.

More than just a digital textbook,

Revel lets you combine content and media  
from more than 25 disciplines

with assessment and data driven guidance  
to create a compelling learning

experience that captures their attention  
and helps them stay on track.

You'll gauge their comprehension  
and improve their writing skills

while they actively read, participate  
and practice on one platform any time,

anywhere on any device, so they can learn  
wherever life takes them.
