

# Pearson eText

Staying connected matters more than ever.

Help your students make stronger connections between assigned reading and what you teach in class by creating a Pearson eText course.

It's easy to create customized notes and highlights that you can share with your students, precisely at a teachable moment. Guiding them through the material, and helping point out important concepts you'll cover in class or on a quiz.

You can set clear expectations with the ability to assign reading, and you can follow up when needed by viewing reading analytics — ensuring your students stay on task.

Connect. Teach. And motivate. All within your Pearson eText course.
