Blended Learning*

Introducing

Pearson Connexus

**Create future-ready learners
with digital learning**

Where are you on the shift to digital? With the right tools, you can transform learning into a personalized experience that engages students and improves their outcomes. How do you become a digital learning visionary? You choose solutions that offer exactly what you need today and can grow to meet your needs tomorrow.

Meet Pearson Connexus

Let's build a solution around your students. Start by selecting online courses that give them choices and opportunities. Then decide what, if any, additional services can help you achieve your vision and transform learning in your school.

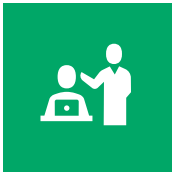

Online Courses & Curriculum

Expanding choices and opportunities

We've got the widest range of content for K-12 learners. Students' needs are increasing, but your resources aren't. That's why innovative education leaders are turning to online courses to bridge the gap.

Pearson Connexus offers over 700 proven, standards-based K-12 courses at a variety of course levels including Core, Foundations, Advanced, and Credit Recovery. We provide a range of instructional settings including summer school, online and blended, project-based, and more. Pearson Connexus meets the needs of every learner right where they are.

Instructional Services

Facilitating interactive, personalized instruction

With Pearson Connexus, online doesn't mean "on your own." You can add instructional support to help your educators and students thrive in an online learning environment. Help your teachers provide more personalized instruction with grading support and integrated LiveTutor to help answer student questions. Or use our certified online teachers to help resolve staffing challenges and provide more course options for your students.

Program Management & Support

Understanding and addressing your school's needs

Courteous help is just a phone call or email away. With our program management and support, you won't be passed on to multiple contacts. Instead, you'll get prompt solutions from professionals trained to help your school get the most out of online and blended learning.

We'll help you make the most of our flexible Connexus®EMS platform, assist with student enrollment and placement, and give you the data you need to assess performance and maintain funding. All so you can focus on reaching your district's goals and adapting your program to meet students' changing needs.

Professional Development & Training

Empowering your teachers and site coordinators

We'll help make sure that your team members are fully supported and well prepared. Your site coordinator and school staff will receive continuous guidance and help as they facilitate their online and blended learning solution.

To help you successfully implement your digital learning program, we provide easy-to-use startup video tutorials. You may also access live training (online or on-site) where your team can ask questions unique to your school or district.

Keeping class in session

Fielding questions from teachers and administrators, technical support can help you expand online learning and keep classes in session without drastically increasing your technology staff's workload.
