GRADPOINT™

# Take personalized learning to the next level

## Limitless online and blended learning

GradPoint® is a student-centered learning platform that engages students and empowers them to take ownership of their learning with student choice and learning incentives. Teachers act as coaches to differentiate, intervene, and motivate students in their personalized learning pathway of rigorous, standards-based instruction.

## A powerful LMS with built-in content

Our robust course catalog is now enhanced with open education resources. Create your own content libraries and give students more choices with our highly customizable learning management system.

## Ongoing progress monitoring

GradPoint's powerful assessment platform measures, tracks, and reports on student growth, student choices, and when to provide interventions. With these insights, you can immediately intervene when students are struggling. And our new communication tools strengthen the online interaction between teachers and students.

# Latest enhancements to the GradPoint platform

This next generation of GradPoint maintains all of the robust features that allow educators to personalize learning and includes more than 30 updates to further support a student-centered learning environment and simplify course management.

## › Improved personalized learning

We've added some powerful upgrades to help teachers monitor student progress, spot struggling students, and differentiate instruction to meet the needs of every learner—including English language learners (ELLs) and students with Individualized Education Plans (IEPs).

Features & Functionality	Benefits for teachers and students
<b>Dashboards</b>	Give teachers a view of student self-assessment in real time and enable quick intervention for struggling students.
<b>Visual indicators of mastery and unit progress</b>	See student performance at-a-glance and quickly and easily track student progress.
<b>Teacher communication tools</b> (Score, completion overrides, assignment feedback, announcements, and emails)	Consolidate and streamline communication with enhanced tools that strengthen the online connection between teachers and students
<b>Surveys</b>	Easily embed surveys and gain input from the class to fuel instruction, inform activities, and help guide lesson planning.
<b>Student report</b>	Provides details on student performance, helping teachers identify areas that might need additional attention.
<b>Mastery report</b>	Get insight into student performance in relationship to learning objectives.
<b>Gradebook report</b>	Track student performance by activity, period, and category, helping teachers monitor student progress.
<b>User Activity report</b>	Manage login and logout session time and enrollment activity, by domain or by user, to help teachers track student engagement.
<b>Multi-level reporting</b>	Show data on course completion totals, course progress, course enrollments, usage times, and passing/completion rates at the district, school, teacher, and student levels.

## 》 Easier course management

### Our learning management system and content library just got more robust.

We're saving teachers more time and giving them more control with the latest enhancements to GradPoint.

Features & Functionality	Benefits for teachers and students
<b>Digital content library*</b>	Easily integrate our expansive, rich digital content, including open education resources (OER), with your course content.
<b>Electronic management of courses</b>	Assign tasks to an individual or groups of students, making for faster, more efficient classroom management.
<b>Project-based learning*</b>	Add templates based on the Buck Institute guidelines to help bring real-world, authentic connections into instruction.
<b>Quick lists</b>	Speed course assignment by assigning groups of students across courses using quick lists.
<b>Session timeout customization</b>	Customize timeout settings for when the platform terminates idle sessions for easier course management.
<b>Profile pictures</b>	Quickly identify account login while in the lab through the use of profile pictures.
<b>File extension type features</b>	Prohibit uploading files by extension type for easier course management.
<b>Domain/Course-level roles</b>	Create new roles specific to domain or course level.
<b>Links at the course/module level</b>	Easily identify account login while in the lab through the use of profile pictures.
<b>Domain-level blackout dates</b>	Set blackout dates at the domain level that apply to all calendars.
<b>Enhanced menu features</b>	Access any menu option or course from anywhere within the application.
<b>Activities</b>	Target instruction and enhance student learning using a student course view.
<b>Calendar</b>	Track all assignments and their due dates. You can view a specific day, week, month, or the entire duration of the course.
<b>People report</b>	Get at-a-glance access to a variety of student data points in one simple, customizable table.
<b>Curriculum map</b>	Manage course items (assessments, assignments, discussion boards, etc.), search the library for new content, add thumbnails to images, align objectives, and more.
<b>Clipboard</b>	Act on data in the performance or people options. Use it to assign additional activities and resources, award badges, and send messages to individuals or groups who need additional help or more engagement.
<b>Translation</b>	Easily reach and engage students with the ability to translate lessons and content into many languages.
<b>NCAA requirements</b>	Meet the needs of all students through college-prep level courses that are aligned to high school academics; taught by qualified certified teachers; that have a combination of assessment types; and are eligible for review by the NCAA Eligibility Center.

\*This feature exists in GradPoint 1.0, but was greatly enhanced for the 2.0 release.

## Increased student empowerment

### GradPoint includes a host of enhancements

to give students choices and upgrade their learning experience.

Features & Functionality	Benefits for teachers and students
<b>Student avatars options and customizable backgrounds</b>	Increase student engagement with a customizable user interface. Students can make GradPoint their own with avatars and personalized backgrounds.
<b>Badges</b>	Easily set benchmarks for students and motivate them to track their results as they work towards their next badge.
<b>Student self-evaluations</b>	Enable students to take ownership over their learning with the ability to gauge their own level of interest, effort, and understanding.
<b>Assign tasks</b>	Use self-assignment tasks and class duties to help students to take more ownership of their learning. Teachers can easily track these tasks and assign extra credit to motivate students.
<b>Search OER</b>	Search open education resources for multimedia content to help students solidify their understanding of concepts and lessons.
<b>Student communication tools</b>	Click on stream to view all teacher communication within the course. This helps to improve communication and collaboration.
<b>Self-registration</b>	Empower students in their learning by allowing them to self-register for courses.
<b>Test preparation</b>	Give students what they need to prepare for college entry (SAT and ACT), high school equivalency testing (GED), and various curriculum examples.

## Opening doors—New ways to use GradPoint

### Personalized summer school

Expand learning into the summer using GradPoint's customized courses during the summer for students who need credit accrual or credit recovery—or a little extra help to stay on track.

### Career and technical education

Use GradPoint's diverse content library alongside your own content to reach students looking for career and technical courses that will give them the skills they need to succeed in the workplace.

### Expanded STEM courses

Rely on GradPoint to provide advanced math and science courses so every student has a path toward college and a career success.

### Ready to make the move?
