Teacher Tips for Personalizing Learning

Need help introducing and enhancing personalized learning practices in your district? Take some tips from members of the Digital Promise League of Innovative Schools—a coalition of forward-thinking districts throughout the country.

**Personalization in Action**

- Provide alternative assessment opportunities that let students show their content understanding in nontraditional ways.
- Emphasize experiential learning, student involvement, and students solving real-world issues.
- Have students set individual goals within the classroom curriculum.

**And 6 ways to do more through digital learning**

- Allocate time for students to practice their computer skills during class.
- Encourage students to use computers for problem-solving and critical-thinking activities.
- Have students use technology outside the classroom to solve real problems.
- Support this by providing continuous access to digital devices.
- Design student-centered, integrated curriculum units that use devices seamlessly.
- Adapt your use of classroom devices based on the newest software applications and research on teaching, learning, and standards-based curriculum.
