Microsoft

Microsoft Certified Fundamentals

The Microsoft Certified Fundamentals certification exams will put your students on the path to becoming the cloud computing consultants and admins of the future.

The future of computing is in the cloud, and the cloud is growing—fast! Whether it's AI, data storage, web hosting, CRM management, or online productivity tools, companies are looking for trained individuals who understand the benefits of the cloud.

These entry-level exams are the first tier in Microsoft's skill-based certification program and will put students on the path to advance into Microsoft's Associate and Expert-level exams, and help prepare them to fill the most in-demand jobs.

Fill the skills gap

Help your students fill the cloud IT skills gap. Prepare them with the Microsoft Certified Fundamentals exams.

Choose a technology

The Microsoft Certified Fundamentals exams are the gateway to Microsoft's more advanced technology-based certification exams.

Powered by Azure

Available on Certiport's Compass, a simple web-based solution, delivered onsite, and powered by Azure. Taking a Microsoft exam has never been easier.

Add value to your classroom with secure and easy-to-use exams

You can deliver exams anywhere on campus anytime it's convenient. All you need is an internet-connected computer and administrative rights. Setup is quick and simple with free on-boarding support available at any time.

How do I get started?

Visit Certiport.PearsonVUE.com/Buy/School to get in contact with your Certiport Territory Manager. They can offer suggestions on which certifications will best benefit your program, help you decide which license best fits your needs, and walk you through the process of becoming a Certiport Authorized Testing Center. They can also help you determine if your state provides funding for the Microsoft Certified Fundamentals exam program.

The Microsoft Certified Fundamentals certification evaluates a candidate's IT foundational knowledge of Microsoft technologies. Technology is always changing and improving, as a result, these exams are updated on an ongoing basis to ensure candidates are being assessed on the most relevant skills within Microsoft technologies. The certification exams cover multiple topics, including:

- Artificial intelligence
- Cloud computing
- Data and analytics
- Cybersecurity
- Business applications
- AI-powered productivity and administration
