Master 17: Activity 7 Assessment Making and Testing Predictions

| Making and Testing Predictions Behaviours/Strategies | | | |
|--|--|--|--|
| Student makes predictions based on personal preferences or feelings. What is your favourite season: Spring, Summer, Fall, Winter? | Student makes reasonable predictions and uses past events to justify them. What is your favourite season: Spring, Summer, Fall, Winter? | Student makes reasonable predictions and tests them in another population but does not survey the same number of individuals. What is your favourite season: | Student makes reasonable predictions and accurately tests those predictions. What is your favourite season: Spring, Summer, Fall, Winter? |
| "My favourite season is Spring because of my birthday, so I think other people will pick Spring too." | "Most students in our class chose Summer. So, I am certain the other class will choose Summer too." | Spring, Summer, Fall, Winter? "In our class, 9 of 10 students chose Summer. I surveyed all students in the other class and 9 of 25 students chose Summer, so it's the same." | "In our class, 9 of 10 students chose Summer. I was certain most students in the other class would also choose Summer. Eight of the 10 students I surveyed did!" |
