

Master 103: Activity 38 Assessment

Making Equal Shares

Solving Equal-Sharing Problems Behaviours/Strategies			
1. Student solves equal-sharing problem, but miscounts and does not start with the correct number of items.		2. Student solves equal-sharing problem, but does not share the items equally.	
3. Student solves equal-sharing problem, but does not share all of the items.		4. Student solves equal-sharing problem, but does not share the correct number of children.	
Observations/Documentation			
5. Student successfully solves equal-sharing problem by sharing items one at a time, but is only comfortable sharing between 2 children.		6. Student successfully solves equal-sharing problem by sharing items one at a time among any number of children.	
7. Student successfully solves equal-sharing problem by sharing more than one item at a time but, in his or her own problem, uses a number that cannot be shared equally.		8. Student successfully solves equal-sharing problem and, in her or his own problem, uses a number that can be shared equally.	
Observations/Documentation			
8. Student successfully solves equal-sharing problem and, in her or his own problem, uses a number that can be shared equally.		8. Student successfully solves equal-sharing problem and, in her or his own problem, uses a number that can be shared equally.
