Activity 5 Assessment Identifying Errors and Missing Terms

Generalizing and Representing Increasing and Decreasing Patterns											
Recognizes that a pattern increases or decreases "The terms are getting bigger."	Identifies how a pattern changes (describes rule) "To get from the first term to the second term, and from the second term to the third term, we add 2 tiles. The pattern grows by 2 tiles each time."	Represents patterns symbolically and writes rules using addition or subtraction 1, 3, 5, "Start at 1 and add 2 each time." 17, 14, 11, "Start at 17 and take away 3 each time."	Extends patterns using repeated addition and subtraction 1, 3, 5, 7, 9, 11, "I added 2 over and over." 17, 14, 11, 8, 5, 2 "I subtracted 3 over and over."								
Observations/Documentation											

Activity 5 Assessment Identifying Errors and Missing Terms

Generalizing and Representing Increasing and Decreasing Patterns (cont'd)										
Finds missing terms or errors in patterns 3, 8, 13, 18, 22, 28, "Start at 3 and add 5 each time. 18 + 5 = 23, so 22 should be 23."	Creates number patterns and identifies finite and infinite whole- number sequences "85, 75, 65, 55, "I skip-counted back by 10s. All the numbers are odd. It is a finite sequence because I will run out of numbers."	Uses patterns to solve problems "If I save 2 quarters a day, when will I have 10 quarters? 2, 4, 6, 8, 10 I will have 10 quarters after 5 days."	Identifies and extends patterns involving multiplication							
			Input	1	2	3	4	5		
			"Each input number is multiplied by 2."
