## Activity 1 Assessment

## Estimating Length

| Measuring Length and Perimeter |  |  |  |
| :---: | :---: | :---: | :---: |
| Uses non-standard units to measure <br> "The rectangle is 5 paper clips long. Its perimeter is 16 paper clips." | Uses standard-sized items to measure <br> "The rectangle is 17 centicubes long. Its perimeter is 54 centicubes." | Uses benchmarks to estimate in standard units ( $\mathrm{m}, \mathrm{cm}$ ) <br> "I used a big step as a referent for one metre. The classroom is about 7 big steps, or 7 m wide. Its perimeter is about 30 big steps, or 30 m ." | Measures using standard units (m, cm) <br> "The perimeter is 28 cm ." |

## Activity 1 Assessment

## Estimating Length

| Measuring Length and Perimeter (con't) |  |  |  |
| :---: | :---: | :---: | :---: |
| Selects and uses appropriate standard units <br> "I would use m because mm and cm are too small. The length of string I wound around the edge is 10 m . So, the perimeter is 10 m . | Relates standard units of length <br> ( $1 \mathrm{~m}=100 \mathrm{~cm}$ ) <br> "The door has a perimeter of 8 m . Since $1 \mathrm{~m}=100 \mathrm{~cm}, 8 \mathrm{~m}=800 \mathrm{~cm}$." | Uses smaller units to give more accurate measures <br> "The pen is between 13 cm and 14 cm long. If I use $\mathrm{mm}, \mathrm{I}$ can be more accurate: 137 mm ." | Compares using standard units <br> "Rectangle: <br> $5+16+5+16=42 \mathrm{~cm}$ <br> Three-quarter circle: $6+6+30=42 \mathrm{~cm}$ <br> The perimeters are the same." |
| Observations/Documentation |  |  |  |
